FOR YOUR SAFETY

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this manual.

- **Qualify Service**: Only qualified personnel may install or repair phone equipment.
- **Accessories and Batteries**: Use only approved accessories and batteries. Do not connect incompatible products.
- **Connecting to Other Devices**: When connecting to any other device, read its user’s guide for detailed safety instructions. Do not connect incompatible products.
- **Backup Copies**: Remember to make backup copies of all important data.
- **Water-Resistance**: Your phone is not water-resistant. Keep it dry.
- **Calling**: Ensure the phone is switched on and in service. Enter the phone number, including the area code, then press . To end a call, press . To answer a call, press .
- **Emergency Calls**: Ensure the phone is switched on and in service. Press as many times as needed (e.g., to exit a call, to exit a menu, etc.) to close the display. Enter the emergency number, then press . Give your location. Do not end the call until told to do so.

- **Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.**
- **Road Safety Comes First**: Don’t use a hand-held phone while driving.
- **Interference**: All wireless phones may get interference, which could affect performance.
- **Switch off in Hospitals**: Follow any regulations or rules. Switch the phone off near medical equipment.
- **Switch off in Aircraft**: Wireless devices can cause interference in aircraft.
- **Switch off when refuelling**: Don’t use the phone at a refuelling point. Don’t use near fuel or chemicals.
- **Switch off near blasting**: Don’t use the phone where blasting is in progress. Observe restrictions, and follow any regulations or rules.
- **Use sensibly**: Use only in the normal position. Don’t touch the antenna unnecessarily.

x Copyright © 2004 Nokia. All rights reserved.
Network Services

The wireless phone described in this guide is approved for use on the EGSM 900, GSM 1800 and GSM 1900 network.

Triband is a network dependent feature. Check with your local service provider if you can subscribe to and use this feature.

A number of features included in this guide are called Network Services. These are special services that you arrange through your wireless service provider. Before you can take advantage of any of these Network Services, you must subscribe to them through your service provider and obtain instructions for their use from your service provider.

Note: Some networks may not support all language-dependent characters and/or services.

About accessories

Check the model number of any charger before use with this device. This device is intended for use when supplied with power from ACP-12, ACP-8, ACP-7 and LCH-9.

Warning: Use only batteries, chargers and accessories approved by the phone manufacturer for use with this particular phone model. The use of any other types may invalidate any approval or warranty applying to the phone, and may be dangerous.

For availability of approved accessories, please check with your dealer.
When you disconnect the power cord of any accessory, grasp and pull the plug, not the cord.
General information

■ Stickers in the sales package
The stickers contain important information for services and customer support purposes.

■ Access codes

• Security code (5 to 10 digits): The security code protects your phone against unauthorised use, and is supplied with the phone. The preset code is 12345. Change the code, and keep the new code secret and in a safe place separate from your phone. To change the code, and to set the phone to request the code, see “Security settings” on page 43.

• PIN code and PIN2 code (4 to 8 digits): The PIN (Personal Identification Number) code protects your SIM card against unauthorised use. The PIN code is usually supplied with the SIM card.

Set the phone to request the PIN code each time the phone is switched on, see "Security settings" on page 43.

The PIN2 code may be supplied with the SIM card and is required to access some functions, such as charging unit counters.

If you key in an incorrect PIN code three times in succession, the phone may display SIM blocked and ask you to enter the PUK code. Contact your service provider to obtain the PUK code.

• PUK and PUK2 codes (8 digits): The PUK (Personal Unblocking Key) code is required to change a blocked PIN code. The PUK2 code is required to change a blocked PIN2 code.

If the codes are not supplied with the SIM card, contact your local service provider for the codes.

• Barring password (4 digits): The barring password is needed when using the Call barring service, see “Security settings” on page 43. You can obtain the password from your service provider.
• **Signing PIN:** The signing PIN is needed for the digital signature. See "Digital signature" on page 70. The signing PIN is supplied with the SIM card if the SIM card has a security module in it. If you key in an incorrect PIN code several times, the phone may display *PIN code blocked* and ask you to key in the PUK code. Contact your service provider to get the PUK code.

• **Wallet code (4–10 digits):** The wallet code is needed to access the wallet services. If you key in a wrong wallet code several times, the wallet application is blocked for five minutes. For further information, see "Wallet" on page 57.
Overview of the functions of the phone

The Nokia 7250 phone provides many functions, which are practical for daily use, such as a Calendar, a Clock, an Alarm clock, a Camera, a Radio, and many more. Also a range of Nokia Xpress-on™ colour covers is available for your phone. To change the covers, see "Changing the covers" on page 8.

- **Camera**
  Your phone has a built-in camera that can be used for taking pictures. After you have taken a picture, you can attach it to a multimedia message and send it via the Multimedia Messaging Service (MMS).
  The pictures can also be used as wallpapers in standby mode.
  You can save your pictures in a compatible PC using the PC Suite software.

- **Multimedia messaging service (MMS)**
  The phone is able to send multimedia messages composed of text and a picture, and to receive messages containing text, a picture and sound. You can save the pictures and ringing tones for personalising your phone. See "Multimedia messages" on page 21.

- **Polyphonic sound (MIDI)**
  Polyphonic sound consists of several sound components played at the same time like a real melody through a speaker. Polyphonic sounds are used in ringing tones and message alert tones. Your phone has sound components from over 40 instruments that can be used for polyphonic sounds, but the phone can only play four instruments simultaneously. The phone supports Scalable Polyphonic MIDI (SP-MIDI) format.
You can receive polyphonic ringing tones via the multimedia service, see "Reading and replying to a multimedia message" on page 23, or download them via the gallery menu, see "Gallery (Menu 8)" on page 47 or via PC suite, see "PC Suite" on page 72.

■ MIDP Java™ applications

Your phone supports Java and includes some Java applications and games that have been specially designed for mobile phones. You can download new applications and games to your phone from a compatible PC with a Java installer software or from WAP services, e.g. from Club Nokia. See "Games (Menu 10)" on page 52.

■ Over the Air (OTA) settings service

In order to use WAP, MMS, GPRS and other wireless services, you need to have proper settings on your phone. You may receive the settings directly as an OTA message and you only need to save the settings on your phone. For more information on the availability of the settings, contact your network operator, service provider or nearest authorised Nokia dealer.

■ General Packet Radio Service (GPRS)

GPRS technology allows mobile phones to be used for sending and receiving data over an Internet Protocol (IP) - based network. GPRS as such is a data bearer that enables wireless access to data networks such as the Internet. The applications that use GPRS are WAP services, MMS and SMS messaging, Java™ application downloading and the PC dial-up (for example, Internet and e-mail).

Before you can use GPRS technology

- Contact your network operator or service provider for availability and subscription to the GPRS service.
- Save the GPRS settings for each of the applications used over GPRS.

See "Setting up the phone for a WAP service" on page 63, "Message settings" on page 26 and "GPRS" on page 62.

Pricing for GPRS and applications

For more detailed information on pricing, contact your network operator or service provider.
**Shared memory**

The following features in this phone may share memory: phone book, text and multimedia messages, images and ringing tones in gallery, calendar, to-do notes, and Java games and applications. Using any such features may reduce the memory available for any features sharing memory. This is especially true with heavy use of any of the features (although some of the features may have a certain amount of memory specially allotted to them in addition to the amount of memory shared with other features). For example, saving many images, java applications etc. may take all of the shared memory and your phone may display a message that the memory is full. In this case, delete some of the information or entries stored in the shared memory features before continuing.
1. Your phone

Keys and connectors

1. Power key
   Switches the phone on and off. For example, when the keypad is locked, pressing the power key briefly turns the phone’s display lights on for approximately 15 seconds.

2. Volume keys
   Keys to adjust the volume of the earpiece, the headset and the loudspeaker.

3. 4-way scroll keys
   Enables scrolling through names, phone numbers, menus or settings.

4. Selection keys
   The function of the keys depends on the guiding text shown on the display above the keys. See “Standby mode” on page 2.

5. ☑️ dials a phone number, and answers a call. In standby mode it shows the most recently called number.

6. ☑️ ends an active call. Exits from any function.

7. ☑️ - enter numbers and characters. ☑️ and ☑️ are used for various purposes in different functions.

1. Charger connector
Your phone

2. Pop-Port™ connector for headsets and the data cable, for example
3. Infrared (IR) port
4. Camera lens on the back cover of the phone.

Standby mode
When the phone is ready for use, and you have not keyed in any characters, the phone is in standby mode.

1. Indicates in which cellular network the phone is currently being used.
2. Shows the signal strength of the cellular network at your current location. The higher the bar, the stronger the signal.
3. Shows the battery charge level. The higher the bar, the more power in the battery.
4. The left selection key in standby mode is Menu.
5. The right selection key in standby mode is Names or Go to

To activate a function in the selection key Go to, press Go to, scroll to the specific function and select it.

To set the functions for the right selection key, see “Right selection key” on page 36.

See also “Essential indicators in standby mode” on page 3.

Screen saver
The phone automatically activates the screen saver, a digital clock view, for power saving in standby mode. It will be activated by a certain time when no function of the phone is used. See “Screen saver” on page 41. Press any key to deactivate the screen saver.

Note that if you have not set the time, 00:00 is displayed. To set the time, see “Clock” on page 36.

Wallpaper
You can set your phone to display a background picture, wallpaper, when the phone is in standby mode. See “Wallpaper” on page 40.
Essential indicators in standby mode

- You have received one or several text or picture messages. See “Reading and replying to a message or an e-mail” on page 19.
- You have received one or several multimedia messages. See “Reading and replying to a multimedia message” on page 23.
- You have received one or several voice messages. See “Voice messages” on page 25.
- The phone’s keypad is locked. See “Keypad lock (Keyguard)” on page 7.
- The phone does not ring for an incoming call or text message when Incoming call alert is set to Off and Message alert tone is set to Off. See “Tone settings” on page 42.
- The alarm clock is set to On. See “Alarm clock” on page 49.
- The countdown timer is running. See “Countdown timer” on page 56.
- The stopwatch is running in the background. See “Stopwatch” on page 56.
- A GPRS dial-up connection is established, refer to “GPRS modem settings” on page 62. The indicator is shown on the top left of the display.
- The GPRS connection is suspended (on hold), for example if there is an incoming or outgoing call during a GPRS dial-up connection.
- Infrared connection indicator, see “Infrared” on page 61.
- All your calls are diverted to another number, Divert all voice calls. If you have two phone lines, the divert indicator for the first line is and for the second line . See “Call divert” on page 37.
- If you have two phone lines, the indicator displays the selected phone line. See “Line for outgoing calls” on page 38.
- The loudspeaker has been activated, see “Loudspeaker” on page 12.
Your phone

Calls are limited to a closed user group. See "Security settings" on page 43.

The timed profile is selected. See "Profiles (Menu 4)" on page 35.

A headset, handsfree, loopset or music stand accessory is connected to the phone.

To enable the phone to show the time and date in standby mode, see "Clock" on page 36 and "Date" on page 37.

Headset

Connect the stereo headset HDS-3 to the Pop-Port connector of your phone as shown in the picture.

For example, you can carry the headset as shown in the picture.

Putting on the wrist strap

Thread the strap as shown in the picture and then tighten it.
2. Getting started

- Installing the SIM card and the battery
  - Keep all miniature SIM cards out of the reach of small children.
  - The SIM card and its contacts can easily be damaged by scratches or bending, so be careful when handling, inserting or removing the card.
  - Before installing the SIM card, always make sure that the phone is switched off and then remove the battery.

1. To remove the back cover off the phone:
   With the back of the phone facing you, push the back cover release button (1) and remove the cover off the phone (2).

2. Remove the battery by lifting it from the end with the finger grip (3).

3. To release the SIM card holder, slide the card holder backwards (4) and open it (5).

4. Insert the SIM card into the SIM card holder (6). Make sure that the SIM card is properly inserted and that the golden contact area on the card is facing downwards.
Getting started

5. Close the SIM card holder (7) and (8).

6. Replace the battery (9).

7. To replace the back cover:
   First place the top of the back cover over the locking catch on the top of the phone (10). Direct the back cover towards the locking catches on both sides of the phone and press to lock the cover into place (11).

Charging the battery

1. Connect the lead from the charger to the socket on the bottom of your phone.

2. Connect the charger to an AC wall socket.
   The text **Charging** is displayed briefly if the phone is switched on. If the battery is completely flat, it may take a few minutes before the charging indicator appears on the display or before any calls can be made.
   You can use the phone while the charger is connected.
   The charging time depends on the charger and the battery used. For example, charging a BLD-3 battery with the ACP-12 charger takes up to one hour and 30 minutes while the phone is in standby mode.
Switching the phone on and off

Press and hold the power key \( \textcircled{1} \).

Note that if the phone displays **Insert SIM card** even though the SIM card is properly inserted, or **SIM card not supported**, contact your network operator or service provider. Your phone does not support 5 Volt SIM cards and the card may need to be changed.

- If the phone asks for a PIN code, key in the PIN code (displayed as ****), and press **OK**.
  
  See also **PIN code request** in "Security settings" on page 43 and "Access codes" on page xii.

- If the phone asks for a security code, key in the security code (displayed as ****), and press **OK**.
  
  See also "Access codes" on page xii.

**Warning:** Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

Keypad lock (Keyguard)

You can lock the keypad to prevent the keys being accidentally pressed, for example, when your phone is in your handbag.

- **Locking the keypad**

  In standby mode, press **Menu** and then \( \text{ within } 1.5 \text{ seconds.} \)

**TIPS ON EFFICIENT OPERATION:** Your phone has a built-in antenna. As with any other radio transmitting device, do not touch the antenna unnecessarily when the phone is switched on. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed. Not touching the antenna area during a phone call optimises the antenna performance and the talktime of your phone.
• Unlocking the keypad
  Press Unlock and then within 1.5 seconds.
To answer a call when the keyguard is on, press . During a call, the phone can be operated normally.
When you end or reject the call, the keypad will automatically be locked.
For automatic keypad locking, see "Automatic keyguard" on page 39.
For locking the keypad during a call, see "Options during a call" on page 12.

Note: When Keyguard is on, calls may be possible to the emergency number programmed into your phone (e.g. 112, 911 or other official emergency number).
Key in the emergency number and press . The number is displayed only after you have keyed in its last digit.

■ Changing the covers
Before changing the cover, always switch off the power and disconnect the phone from the charger or any other device. Always store and use the phone with the covers attached.
1. Remove the back cover of the phone. See the step 1 in "Installing the SIM card and the battery" on page 5.
2. To remove the front cover, gently pull the locking catch on the top of the front cover from the locking hole in the phone (1) and remove the cover starting from the top.

Copyright © 2004 Nokia. All rights reserved.
3. Place the key mat on the new front cover (2).

4. To replace the front cover, first place the catches on the lower part of the cover into the corresponding holes on the phone (3) and then gently push the catch on the top of the cover through the locking hole on the top of the phone (4). Press the cover into place.

5. Replace the back cover of the phone. See step 7 in "Installing the SIM card and the battery" on page 5.
3. Call functions

- Making a call
  1. Key in the phone number, including the area code. If you key in an incorrect character, press Clear to delete it.
     For international calls, press twice for the international prefix (the + character replaces the international access code) and then key in the country code, the area code without the leading 0, if necessary, and the phone number.
  2. Press , to call the number.
  3. Press or to end the call or to cancel the call attempt.

See also "Options during a call" on page 12.

- Making a call using the phone book
  • See "Searching for a name in the phone book" on page 32. Press  to call the number on the display.

- Last number redialling
  • In standby mode, press once to access the list of the last 20 numbers you called or attempted to call. Scroll to the number or name you want, and press  to call the number.

Calling your voice mailbox
• In standby mode, press and hold 1 and press 0, or press 1 and .
  If the phone asks for the voice mailbox number, key it in and press OK. See also "Voice messages" on page 25.

- Speed dialling a phone number
Before you can use speed dialling, assign a phone number to one of the speed dialling keys, from 2 to 9, see "Speed dials" on page 34.
Call the number in either of the following ways:
• Press the speed dialling key you want and then press .
• If Speed dialling is set to on, press and hold a speed dialling key until the call is started. See "Speed dialling" on page 38.

- Making a conference call
Conference calling is a network service that allows up to six persons to take part in a conference call.
  1. Make a call to the first participant.
  2. To make a call to a new participant, press Options and select New call.
3. Key in, or retrieve from the memory, the phone number of the new participant and press Call. The first call is put on hold.

4. When the new call has been answered, join the first participant in the conference call. Press Options and select Conference.

5. To add a new participant to the call, repeat steps 2 to 4.

6. To have a private conversation with one of the participants:
   Press Options and select Private and select the desired participant. Rejoin the conference call as described in step 4.

7. To end the conference call, press .

Answering or rejecting an incoming call
Press \ to answer an incoming call and press \ to end the call.
Press \ to reject an incoming call.
If you press Silence, only the ringing tone is muted. Then either answer or reject the call.

If the headset HDB-4 or HDS-3 is connected to the phone, you can answer and end a call by pressing the headset key.

Tip: If the Divert if busy function is activated to divert the calls, for example to your voice mailbox, rejecting an incoming call will also divert the call. See “Call divert” on page 37.

Note that when somebody is calling you, the phone shows the caller’s phone number or the text Private number or Call. If more than one name is found in the phone book with the same phone number as the caller’s number, only the phone number will be displayed, if this is available.

Call waiting
During a call, press \ to answer the waiting call. The first call is put on hold. Press \ to end the active call.
To activate the Call waiting function, see “Call waiting” on page 38.
Options during a call

Many of the options that you can use during a call are network services. Press Options during a call for some of the following options:

- **Mute** or **Unmute**, **End call**, **End all calls**, **Phone book**, **Menu** and **Hold** or **Unhold**, **New call**, **Conference**, **Private**, **Answer**, **Reject** and **Loudspeaker** or **Handset**.

**Lock keypad** to activate the keypad lock.

**Send DTMF** to send DTMF tone strings, for example, passwords or bank account numbers. Key in the DTMF string or search for it in the phone book and press **OK**. Note that you can key in the wait character w and the pause character p by repeatedly pressing $\uparrow +$.

**Swap** to switch between the active call and the call on hold, **Transfer** to connect a call on hold to an active call, and disconnect yourself from the calls.

### Loudspeaker

You can use your phone as a loudspeaker during a call. Do not hold the phone to your ear during loudspeaker operation.

- To activate the loudspeaker, press **Options** and select **Loudspeaker**, or press **Loudsp.**, if available.
- To deactivate the loudspeaker during a call, press **Options** and select **Handset**, or press **Handset**, if available.

If you have connected the handsfree unit CARK126 or the headset to the phone, **Handset** in the options list is replaced with **Handsfree** or **Headset** and the selection key **Handset** with **Handsfr.** or **Headset**, respectively.

The loudspeaker is automatically deactivated when you end the call or call attempt or connect the handsfree unit or headset to the phone.

Using the loudspeaker with the radio, see “Using the radio” on page 45.
4. Writing text

You can key in text, for example when writing messages, using traditional or predictive text input.

When you are writing text, the predictive text input is indicated by \(\text{abc}\) and the traditional text input by \(\text{XY}\) at the top left of the display. The character case is indicated by \(\text{abc}\), \(\text{ABC}\), or \(\text{ABc}\) next to the text input indicator. You can change the character case by pressing \(\text{abc}\). The number mode is indicated by \(\text{123}\), and you can change between the letter and number mode by pressing and holding \(\text{abc}\).

**Setting predictive text input on or off**

When writing text, press Options and select Dictionary.

- To set the predictive text input on, select a language in the dictionary options list. Predictive text input is only available for the languages on the list.
- To revert to traditional text input, select Dictionary off.

Tip: To quickly set the predictive text input on or off when writing text, press \(\text{abc}\) twice, or press and hold Options.

**Using predictive text input**

You can key in any letter with a single keypress. The predictive text input is based on a built-in dictionary to which you can also add new words.

1. Start writing a word using the keys \(\text{2abc}\) to \(\text{9jkl}\). Press each key only once for one letter. The word changes after each keystroke.

   **Example:** To write Nokia when the English dictionary is selected, press \(\text{6once for N, 3once for o, 5once for k, 4once for i and 2once for a:}\)

   To insert a number while in letter mode, press and hold the desired number key.

   More instructions for writing text, see “Tips for writing text” on page 15.
**Writing text**

2. When you have finished writing the word and it is correct, confirm it by adding a space with  or by pressing any of the scroll keys. Pressing a scroll key also moves the cursor.

   If the word is not correct, press repeatedly or press **Options** and select **Matches**. When the word you want appears, confirm it.

   If the ? character is displayed after the word, the word you intended to write is not in the dictionary. To add the word to the dictionary, press **Spell**, key in the word (traditional text input is used) and press **Save**. When the dictionary becomes full, the new word replaces the oldest one that was added.

3. Start writing the next word.

**Writing compound words**

Key in the first part of the word and confirm it by pressing . Write the last part of the word and confirm the word.

■ **Using traditional text input**

   Press a number key, to , repeatedly until the desired character appears. Not all characters available under a number key are printed on the key. The characters available depend on the language selected in the **Language** menu, see "Language" on page 39.

   To insert a number while in letter mode, press and hold the desired number key.

   - If the next letter you want is located on the same key as the present one, wait until the cursor appears, or press any of the scroll keys and then key in the letter.

   - The most common punctuation marks and special characters are available under the number key.

More instructions for writing text, see "Tips for writing text" on page 15.
Tips for writing text

The following functions may also be available for writing text:

- To insert a space, press 0.
- To move the cursor to the left, right, down or up, press the scroll keys ▼, ▶, ◄ or ►, respectively.
- To delete a character to the left of the cursor, press Clear. Press and hold Clear to delete the characters more quickly.
- To delete all the characters at once when writing a message, press Options and select Clear text.
- To insert a word when using the predictive text input, press Options and select Insert word. Write the word using the traditional text input and press Save. The word is also added to the dictionary.
- To insert a special character when using the traditional text input, press 토~, or when using the predictive text input, press and hold 토~. or press Options and select Insert symbol.
- Press any of the scroll keys to scroll to a character and press Use to select the character.

You can also scroll to a character by pressing 2ABC, 4def, 6 or 8hij, and select the character by pressing 5klm.

The following options are available when writing text messages:

- To insert a number while in letter mode, press Options and select Insert number. Key in the phone number or search for it in the phone book and press OK.
- To insert a name from the phone book, press Options and select Insert name. To insert a phone number or a text item attached to the name, press Options and select View details.
5. Using the menu

The phone offers you an extensive range of functions, which are grouped into menus. Most of the menu functions are provided with a brief help text. To view the help text, scroll to the menu function you want and wait for 15 seconds. To exit the help text, press Back. See “Help text activation” on page 40.

Accessing a menu function

By scrolling
1. To access the menu, press Menu.
2. Scroll with or through the menu and select, for example, Settings by pressing Select.
3. If the menu contains submenus, select the one you want, for example Call settings.
4. If the selected submenu contains further submenus, repeat step 3. Select the next submenu, for example Anykey answer.
5. Select the setting of your choice.
6. Press Back to return to the previous menu level, and Exit to exit the menu.

By using a shortcut

The menus, submenus and setting options are numbered and you can access them by using their shortcut number.
- To access the menu, press Menu. Key in quickly, within two seconds, the index number of the menu function you want to access.

Example: To set the Anykey answer On, press Menu, 5, 7, 2 and 1. Press Back to return to the previous menu level, and Exit to exit the menu.
6. Menu functions

■ Messages (Menu 1)
You can read, write, send and save text, multimedia and e-mail messages. All messages are organised into folders.
Before you can send any text, picture, or e-mail message, you need to save your message centre number, see "Message settings" on page 26.

Text messages
Your phone can send and receive multi-part messages, which consist of several ordinary text messages (network service). Invoicing is based on the number of ordinary messages that are required for a multi-part message.

You can also send and receive text messages that contain pictures. Each picture message is made up of several text messages. Therefore, sending one picture message may cost more than sending one text message.

Note: Picture message function can be used only if it is supported by your network operator or service provider. Only phones that offer picture message features can receive and display picture messages.

Writing and sending messages
The number of available characters and the current part number of a multi-part message are shown on the top right of the display.

1. Press Menu, and select Messages, Text messages and Create message.

Tip: To quickly open Create message, press in standby mode.

2. Key in a message. See "Writing text" on page 13. To insert text templates or a picture into the message, see "Templates" on page 20.

3. To send the message, press Options and select Send.

4. Enter the recipient's phone number or search for the phone number in the phone book.
Press OK to send the message.
Note: When sending messages via the SMS network service, your phone may display the words *Message sent*. This is an indication that the message has been sent by your phone to the message centre number programmed into your phone. This is not an indication that the message has been received at the intended destination. For more details about SMS services, check with your service provider.

**Options for sending a message**
After you have written a message, press **Options** and select **Sending options**.

- To send a message to several recipients, select **Send to many**. When you have sent the message to everyone you want to send it to, press **Done**.
- To send a message using a message profile, select **Sending profile** and then the desired message profile.

To define a message profile, see "Message settings" on page 26.

**Writing and sending e-mail**
Before you can send e-mail via SMS, you need to save the settings for sending e-mail, see "Message settings" on page 26. For availability and subscription to the e-mail service, contact your network operator or service provider. To save an e-mail address in the phone book, see "Saving multiple numbers and text items per name" on page 31.

1. Press **Menu**, and select **Messages**, **Text messages** and **Create e-mail**.
2. Key in the recipient’s e-mail address or search for it in the phone book and press **OK**.
3. If you wish, you can key in the subject for the e-mail and press **OK**.
4. Key in the e-mail message. See "Writing text" on page 13. The total number of characters that you can key in is shown on the top right of the display. The e-mail address and subject are included in the total number of characters.

See also "Inserting a text template into a message or into an e-mail" on page 20. Pictures cannot be inserted.
5. To send the e-mail, press **Options** and select **Send e-mail**. If you have not saved the settings for sending e-mails, the phone asks for the number of the e-mail server.

Press **OK** to send the e-mail.

**Note:** When sending e-mails via the SMS network service, your phone may display the words *Message sent*. This is an indication that the e-mail has been sent by your phone to the e-mail server. This is not an indication that the e-mail has been received at the intended destination.

For more details about e-mail services, check with your service provider.

**Reading and replying to a message or an e-mail**

When you have received a message or an e-mail, the indicator  and the number of new messages followed by *message(s) received* are shown.

The blinking  indicates that the message memory is full. Before you can receive new messages, delete some of your old messages in the *Inbox* folder.

The text messages function uses shared memory, see “*Shared memory*” on page xvi.

1. Press **Show** to view the new message, or press **Exit** to view it later.

**Reading the message later:**

Press **Menu**, and select **Messages, Text messages** and **Inbox**.

2. If more than one message has been received, select the one that you want to read. An unread message is indicated by  in front of it.

3. While reading or viewing the message, press **Options**.

You can select an option, for example, to delete, forward or edit the message as a text message or an e-mail, move and rename the message you are reading.

Select **Copy to calendar** to copy text at the beginning of the message to your phone’s calendar as a reminder note for the current day.

Select **Message details** to view the sender’s name and phone number, the message centre used, and the date and time of receipt.
Menu functions

Select **Use detail** to extract numbers, e-mail addresses and website addresses from the current message.

When reading a picture message, select **Save picture** to save the picture in the **Templates** folder.

4. Select **Reply** to reply to a message. Select **Original text** to include the original message in the reply, or select a standard answer to be included in the reply, or select **Empty screen**.

When replying to an e-mail, confirm or edit the e-mail address and subject first. Then write your reply message.

5. Press **Options**, select **Send**, and press **OK** to send the message to the displayed number.

Inbox and outbox folders

The phone saves incoming text messages in the **Inbox** folder and sent messages in the **Sent items** folder of the **Text messages** submenu.

Text messages that you wish to send later can be saved in the **Archive**, **My folders** or **Templates** folder.

**Templates**

Your phone includes text templates, indicated by ☐, and picture templates, indicated by ☐. To access the template list, press **Menu**, and select **Messages, Text messages** and **Templates**.

Inserting a text template into a message or into an e-mail

- When you are writing or replying to a message or an e-mail, press **Options**. Select **Use template** and select the template that you want to insert.

Inserting a picture into a text message

- When you are writing or replying to a message, press **Options**. Select **Insert picture** and select a picture to view it. Press **Insert** to insert the picture into your message. The ☐ indicator in the header of the message indicates that a picture has been attached. The number of characters that you can enter in a message, depends on the size of the picture.

To view the text and the picture together before sending the message, press **Options** and select **Preview**.
Archive folder and my folders
To organise your messages, you can move some of them to the Archive folder, or add new folders for your messages.

While reading a message, press Options. Select Move, scroll to the folder that you want to move the message to and press Select.
To add or delete a folder, press Menu, and select Messages, Text messages and My folders.
- To add a folder, press Options and select Add folder.
- To delete a folder, scroll to the folder that you want to delete, press Options and select Delete folder.

Multimedia messages
A multimedia message can contain text, sound and a picture. The phone supports multimedia messages that are up to 45 KB in size. If the maximum size is exceeded, the phone may not be able to receive the message. Depending on the network, you may receive a text message that includes an Internet address where you can view the multimedia message.
If the message contains a picture, the phone scales it down to fit the display area.

Note: If Allow multimedia reception is set to Yes or In home network, your operator or service provider may charge you for every message you receive.

Multimedia messaging supports the following formats:
- Picture: JPEG, GIF, PNG, and BMP.
- Sound: Scalable Polyphonic MIDI (SP-MIDI) and monophonic ringing tones.

If a received message contains any unsupported elements, they may be replaced with the file name and the text Object format not supported.
Menu functions

Note that you are not able to receive any multimedia messages if you have a call in progress, a game or another Java application running, or an active WAP connection over GSM data (see "Keying in the service settings manually" on page 64). Because delivery of multimedia messages can fail for a variety of reasons, do not rely solely upon them for essential communications.

Writing and sending a multimedia message
To set the settings for multimedia messaging, see "Settings for multimedia messages" on page 27. For availability and a subscription to the multimedia messaging service, contact your network operator or service provider.

1. Press Menu, and select Messages, Multimedia msgs, and Create message.

2. Key in a message. See "Writing text" on page 13.

You can insert one picture in a multimedia message. To insert a picture, press Options, and select Insert image. The list of available folders in the Gallery is shown. Open a specific folder, scroll to the desired picture, press Options and select Insert. The □ indicator in the header of the message indicates that a picture has been attached.

To insert a name from the phone book, press Options, select More options and Insert name. Scroll to the desired name, press Options and select Insert contact.

To insert a number, press Options, select More options and Insert number. Key in the number or search for it in the phone book, and press OK.

3. To view the message before sending it, press Options and select Preview.

4. To send the message, press Options and select Send to number (or Send to e-mail).

5. Enter the recipient’s phone number (or e-mail address) or search for it in the phone book. Press OK and the message is moved to the Outbox folder for sending.

It takes more time to send a multimedia message than to send a text message. While the multimedia message is being sent, the animated indicator □ is displayed and you can use other functions on the phone. If there is an interruption while the message is being sent, the phone tries to resend it a few times. If this fails, the message will remain in the Outbox folder and you can try to resend it later.
The messages that you have sent will be saved in the **Sent items** folder if the setting **Save sent messages** is set to **Yes**. See “**Settings for multimedia messages**” on page 27.

**Reading and replying to a multimedia message**

When your phone is receiving a multimedia message, the animated indicator  is displayed. When the message has been received, the indicator ☑ and the text **Multimedia message received** are shown.

The blinking ☑ indicates that the memory for multimedia messages is full, see “**Multimedia messages memory full**” on page 24.

The multimedia message function uses shared memory, see “**Shared memory**” on page xvi.

1. Press **Show** to view the message, or press **Exit** to view it later.
   - **Reading the message later:** Press **Menu**, and select **Messages**, **Multimedia msgs.** and **Inbox**.
2. Scroll to view the message. Press **Options** and some of the following options may be available.

   - **Delete message** to delete a saved message.
   - **Reply** to reply to the message. To send the reply, press **Options** and select **Send**. The sender's phone number (or e-mail address) is used as the default value.
   - **Forward to no. or Forward to e-mail** to forward the message to a phone number or e-mail address.
   - **Edit** to edit a message. You can only edit messages you have written. See “**Writing and sending a multimedia message**” on page 22.
   - **Message details** to view the subject, size and class of the message.
   - **Details** to view the details of the attached image or sound.
   - **Play** to listen to the ringing tone or to view animated images if contained in the message.
   - **Save sound clip** to save the ringing tone in the **Gallery**.
   - **Save image** to save the picture in the **Gallery**.
Menu functions

Inbox, Outbox, Saved and Sent items folders
The phone saves the multimedia messages that have been received in the Inbox folder of the Multimedia msgs. submenu.

Multimedia messages that have not yet been sent are moved to the Outbox folder of the Multimedia msgs. submenu.

The multimedia messages that you wish to send later, can be saved in the Saved items folder of the Multimedia msgs. submenu.

The multimedia messages that have been sent are saved in the Sent items folder of the Multimedia msgs. submenu if the setting Save sent messages is set to Yes. See “Settings for multimedia messages” on page 27.

Multimedia messages memory full
When you have a new multimedia message waiting and the memory for the messages is full, the indicator ✂️ blinks and Multimedia memory full, view waiting msg. is shown. To view the waiting message, press Show. To save the message, press Options, select Save message and delete old messages by first selecting the folder and then the old message to be deleted.

To discard the waiting message, press Exit and Yes. If you press No, you can view the message.

Deleting messages
1. To delete text messages, press Menu, and select Messages, Text messages and Delete messages.

To delete all text messages from all folders, select All messages and when Delete all messages from all folders? is displayed, press OK. If the folders contain unread messages, the phone will ask whether you want to delete them also.

To delete multimedia messages, press Menu, and select Messages, Multimedia msgs. and Delete messages.

2. To delete all messages from a folder, select the folder where you want to delete the messages and press OK. If the folder contains unread messages, the phone will ask whether you want to delete them also.

Chat
You can have a conversation with another person using this faster text messaging application. You cannot save received or sent messages, but you can view them while chatting. Each chat message is priced as a text message.
1. To start a chat, press Menu, select Messages and Chat. Key in or search the phone book for the phone number of the person with whom you want to start a chat session and press OK.

   Another way to start a chat:
   When you have received a message, press Show to read it.
   To start a chat, press Options and select Chat.

2. Key in your nickname for the chat and press OK.

3. Write your chat message, see “Writing text” on page 13.

4. To send the message, press Options and select Send.

5. The reply message from the other person is shown above your original message.
   To reply to the message, press OK and repeat steps 3 and 4.

6. To end the chat session, press OK and Options, and select Quit.

   To view the most recent messages of the current chat session, press Options and select Chat history. The messages that you sent are indicated by “<” and your nickname and the messages that you received are indicated by “>”, and the sender’s nickname. Press Back to return to the message you are currently writing. To edit your nickname, select the option Chat name.

**Voice messages**

Voice mailbox is a network service and you may need to subscribe to it. For more information and for the voice mailbox number, contact your service provider.

Press Menu, and select Messages and Voice messages. Select

- **Listen to voice messages** to call your voice mailbox at the phone number that you have saved in the Voice mailbox number menu.

  Each phone line may have its own voice mailbox number, see “Line for outgoing calls” on page 38.

- **Voice mailbox number** to key in, search for or edit your voice mailbox number and press OK to save it.

If supported by the network, the indicator will show new voice messages. Press Listen to call your voice mailbox number.

Tip: Pressing and holding calls your voice mailbox.

**Info messages**

With the info message network service you can receive messages on various topics from your service provider, for example weather or traffic conditions. For available topics and the relevant topic numbers, contact your service provider.
If the GPRS connection is set to Always online, the info messages may not be received. In that case, set the GPRS connection to When needed, see “GPRS connection” on page 62.

Message settings
The message settings affect the sending, receiving and viewing of messages.

Settings for text and e-mail messages
1. Press Menu, and select Messages, Message settings, Text messages and Sending profile.
2. If more than one message profile set is supported by your SIM card, select the set you want to change.
   • Select Message centre number to save the phone number of the message centre that is required for sending text messages. You will receive this number from your service provider.
   • Select Messages sent as to select the message type Text, E-mail, Paging or Fax.
   • Select Message validity to select the length of time for which the network should attempt to deliver your message.
   • For message type Text, select Default recipient number to save a default number for sending messages for this profile.
   For message type E-mail, select E-mail server to save the e-mail server number.
   • Select Delivery reports to ask the network to send delivery reports about your messages (network service).
   • Select Use GPRS to set GPRS as the preferred SMS bearer.
   • Select Reply via same centre to allow the recipient of your message to send you a reply via your message centre (network service).
   • Select Rename sending profile to change the name of the selected message profile. The message profile sets are only displayed if your SIM card supports more than one set.
**Menu functions**

**Overwrite settings**
When the text message memory is full, the phone cannot receive or send any new messages. However, you can set the phone to automatically replace old text messages in the *Inbox* and *Sent items* folders with the new ones.

Press Menu, and select *Messages*, *Message settings*, *Text messages* and *Overwriting in inbox* or *Overwriting in sent items*. Select *Allowed* to set the phone to replace the old text messages with new ones in the *Inbox* or the *Sent items* folder, respectively.

**Settings for multimedia messages**
Press Menu, and select *Messages*, *Message settings* and *Multimedia msgs.*. Select

- **Save sent messages**. Select *Yes* to set the phone to save sent multimedia messages in the *Sent items* folder. If you select *No*, the sent messages are not saved.
- **Allow multimedia reception**. Choose *No*, *Yes* or *In home network* to use the multimedia service. If you choose *In home network*, you cannot receive multimedia messages when outside your home network.

- **Incoming multimedia messages**. Select *Retrieve* to set the phone to automatically fetch newly received multimedia messages, or select *Reject* if you do not wish to receive multimedia messages. This setting is not shown if the *Allow multimedia reception* is set to *No*.

- **Connection settings**. Define WAP connection settings for retrieving multimedia messages. Activate the set where you want to save the connection settings and then edit the settings.

- **Settings’ name**. Key in the new name for the connection set and press *OK*.
- **Homepage**. Key in the homepage address of the WAP service that you want to use, press *[]* for a dot, and press *OK*.
- **Session mode**. Select *Permanent* or *Temporary*.
- **Data bearer**. Select *GPRS*.
- **GPRS access point**. Key in the access point name to establish a connection to a GPRS network and press *OK*. Contact your network operator or service provider for the access point name.
Menu functions

- **IP address.** Key in the address, press  for a dot, and press OK. You obtain the IP address from your network operator or service provider.
- **Authentication type.** Select Secure or Normal.
- **User name.** Key in the user name and press OK.
- **Password.** Key in the password and press OK.
- **Allow adverts.** You can receive or reject advertisements. This setting is not shown if the Allow multimedia reception is set to No.

To receive the multimedia connection settings as a text message

You may receive the service settings as a text message from the network operator or service provider that offers the WAP service that you want to use. For more information, contact your network operator or service provider. You can also visit Club Nokia’s website (www.club.nokia.com), availability may vary by country.

**Font size setting**

To select the font size for reading and writing messages, press Menu, and select Messages, Message settings, Other settings and Font size.

**Service commands**

Press Menu, and select Messages and Service commands. Key in and send service requests (also known as USSD commands), such as activation commands for network services, to your service provider.

■ **Call register** (Menu 2)

The phone registers the phone numbers of missed, received and dialled calls, and the approximate length and cost of your calls.

The phone registers missed and received calls only if the network supports these functions, the phone is switched on and within the network’s service area.

When you press Options in the Missed calls, Received calls and Dialled numbers menu, you can, for example, view the date and the time of the call, edit or delete the phone number from the list, save the number in the phone book, or send a message to the number.
Recent calls lists
Press Menu, and select Call register and then select
- Missed calls to view the list of the last ten phone numbers from which somebody has tried to call you (network service). The number in front of the (name or) phone number indicates the amount of call attempts from that caller.

Tip: When a note about missed calls is displayed, press List to access the list of phone numbers. Scroll to the number you would like to call back and press .

- Received calls to view the list of the last ten phone numbers from which you have most recently accepted calls (network service).

- Dialed numbers to view the list of the 20 phone numbers that you have most recently called or attempted to call. See also “Last number redialling” on page 10.

- Delete recent call lists to delete the recent calls lists. Select whether you want to delete all the phone numbers in the recent calls lists, or only those numbers in the missed calls, received calls or dialed numbers lists. You cannot undo the operation.

Call counters and call timers
Note: The actual invoice for calls and services from your service provider may vary, depending upon network features, rounding-off for billing, taxes and so forth.
Press Menu, and select Call register and then select
- Call duration, scroll to view the approximate duration of your incoming and outgoing calls in hours, minutes and seconds. The security code is required to clear the timers.

Each phone line has its own call timers and the timers of the selected line are displayed. See ”Line for outgoing calls” on page 38.

- Call costs (network service). Select Last call units or All calls’ units to check the cost of your most recent call or all calls in terms of units specified within the Show costs in function.

Select Call cost settings and select Clear counters to clear the counters, or select Show costs in to set the phone to show the remaining talk time in terms of charging units, Units, or units of currency, Currency. Contact your service provider for charging unit prices.
Menu functions

Select **Call cost limit** to limit the cost of your calls to a certain amount of charging units or units of currency. The PIN2 code is required for the call cost settings.

**Note:** When no more charging units or currency units are left, calls may only be possible to the emergency number programmed into your phone (e.g. 112, 911 or other official emergency number).

- **GPRS data counter.** Scroll to check the amounts of data that were sent or received data in last session, data sent and received in total, and to clear the counters. The counter unit is a byte. The security code is required to clear the counters.

- **GPRS connection timer.** Scroll to check the duration of the last GPRS connection or the total GPRS connection. You can also clear the timers. To clear the timers, the security code is required.

---

Phone book (Menu 3)

You can save names and phone numbers in the phone's memory (internal phone book) and in the SIM card's memory (SIM phone book).

- The internal phone book may save up to 500 names with numbers and text notes about each name. The number of names that can be saved depends on the length of the names, and the number and length of the phone numbers and text items.

- The phone supports SIM cards that can save up to 250 names and phone numbers. Names and numbers saved in the SIM card's memory, are indicated by 

Selecting the phone book settings

Press **Menu** and select **Phone book** and **Settings.** Select

- **Memory in use** to select the phone book you want to use. To recall names and numbers from both phone books, select **Phone and SIM.** In that case, the names and numbers will be saved in the phone's memory.
• **Phone book view** to select how the names and numbers in the phone book are displayed.

• **Memory status** to see how many names and phone numbers are currently saved and how many can still be saved in the selected phone book.

**Saving names and phone numbers (Add name)**
Names and numbers will be saved in the used memory, see “Selecting the phone book settings” above.

1. Press Menu and select **Phone book** and **Add name**.
2. Key in the name and press **OK**. See “Using traditional text input” on page 14.
3. Key in the phone number, and press **OK**. To key in the numbers, see “Making a call” on page 10.
4. When the name and number are saved, press **Done**.

Tip: Quick save In standby mode, key in the phone number. Press **Options**, and select **Save**. Key in the name, press **OK** and **Done**.

**Saving multiple numbers and text items per name**
You can save different types of phone numbers and short text items per name in the phone’s internal phone book.

The first number saved is automatically set as the default number and it is indicated with a frame around the number type indicator, for example 📞. When you select a name from the phone book, for example to make a call, the default number is used unless you select another number.

1. Make sure that the memory in use is either **Phone** or **Phone and SIM**. See “Selecting the phone book settings” on page 30.
2. To access the list of names and phone numbers, press 📲 in standby mode.
3. Scroll to the name saved in the phone’s internal phone book to which you want to add a new number or text item, and press **Details**.
4. Press **Options** and select **Add number** or **Add detail**.
Menu functions

5. Select one of the following number types General, Mobile, Home, Office and Fax, or text types E-mail address, Web address, Postal address and Note.
To change the number or text type, select Change type in the options list.
6. Key in the number or text item and press OK to save it.
7. Press Back and then Exit to return to standby mode.

Changing the default number
Press in standby mode, scroll to the name you want and press Details. Scroll to the number you want to set as the default number. Press Options and select Set as default.

Searching for a name in the phone book
1. Press Menu and select Phone book and Search.
2. You can key in the first characters of the name you are searching for in the pop-up window.
Press and to scroll through the names in the list, and and to move the cursor in the pop-up window.

3. Scroll to the name you want, and press Details. Scroll to view the details of the selected name.
Tip: To quickly find a name and phone number, press in standby mode. Key in the first letter(s) of the name, and/or scroll to the name you want.
Tip: To quickly view a specific name with the default phone number, press and hold at the name while scrolling through the names.

Editing a name, number or text item
Search for the name (and number) you want to edit and press Details. Scroll to the name, number or text item you want to edit, and press Options. Select Edit name, Edit number or Edit detail and edit the name, number or text and press OK.

Deleting names and numbers
Press Menu and select Phone book and Delete.
- To delete names and numbers one by one, select One by one and scroll to the name (and number) you want to delete. Press Delete and press OK to confirm.
Menu functions

To delete names and numbers in the phone book all at once, select Delete all and then scroll to the phone book, Phone or SIM card and press Delete. Press OK and confirm with the security code.

Deleting numbers or text items
Press in standby mode, scroll to the desired name (and number) and press Details. Scroll to the number or text item you want to delete, press Options and select Delete number or Delete detail, respectively.

Copying phone books
You can copy names and phone numbers from the phone's memory to your SIM card's memory and vice versa. Note that any text items saved in the phone's internal memory, such as e-mail addresses, will not be copied to the SIM card.

1. Press Menu and select Phone book and Copy.
2. Select the copying direction, From phone to SIM card or From SIM card to phone.
3. Select One by one, All or Default numbers.
   • If you select One by one, scroll to the name you want to copy and press Copy.

Default nos. is shown if you copy from the phone to the SIM card. Only the default numbers will be copied.

4. To choose whether you want to keep or delete the original names and numbers, select Keep original or Move original.
   • If you select All or Default nos., press OK when Start copying? or Start moving? is displayed.

Sending and receiving a business card
You can send and receive a person's contact information as a business card either via IR or as an Over The Air (OTA) message if supported by the network.

Receiving a business card
To receive a business card via IR, make sure that your phone is ready to receive data through its IR port, see “Infrared” on page 61. The user of the other phone can now send the name and phone number via Infrared.
When you have received a business card via IR or as an OTA message, press Show. Press Save to save the business card in the phone's memory. To discard the business card, press Exit and then OK.
Menu functions

Sending a business card
You can send a business card via IR or as an OTA message to a compatible phone or other handheld device which supports the vCard standard.

1. To send a business card, search for the name and phone number you want to send from the phone book, press Details and Options and select Send bus. card.

2. To send the business card via IR, make sure that the other phone or the PC is set up to receive data via its IR port and select Via infrared.

   To send the business card as an OTA message, select Via text message.

Speed dials
To assign a number to a speed dialling key, press Menu and select Phone book and Speed dials and scroll to the speed dialling key number you want.

Press Assign, press Search, and select first the name and then the number you want to assign. If a number has already been assigned to the key, press Options, and you can view, change or delete the assigned number. If the Speed dialling function is off, the phone asks whether you want to activate it. Press Yes to activate the function. Refer to “Speed dialling” on page 38.

To make a call using the speed dialling keys, see “Speed dialling a phone number” on page 10.

Info numbers
For availability, contact your network operator or service provider.
Press Menu and select Phone book and Info numbers. Scroll through a category to an information number and press \( \text{Call number} \) to call the number.

Service numbers
You can call the service numbers of your service provider if the numbers are included in your SIM card.
Press Menu and select Phone book and Service numbers. Scroll to a service number and press \( \text{Call number} \) to call the number.

My numbers
The phone numbers assigned to your SIM card are saved in My numbers if this is allowed by the card. To view the numbers press Menu and select Phone book and My numbers. Scroll to the desired name or number, and press View.
Caller groups
You can arrange the names and phone numbers saved in the phone book into caller groups. For each caller group, you can set the phone to sound a specific ringing tone and show a selected graphic on the display when you receive a call from a phone number in the group, see below. To set the phone to ring only upon calls from phone numbers belonging to a selected caller group, see Alert for in "Tone settings" on page 42.

Press Menu and select Phone book and Caller groups and select the desired caller group. Select

- Group name, key in a new name for the caller group and press OK.
- Group ringing tone and select the ringing tone for the group. Default is the ringing tone selected for the currently active profile.
- Group logo and select On to set the phone to display the group logo, Off not to display it, or View to view the logo.

- Group members to add a name to the caller group, press Options and select Add name. Scroll to the name you want to add to the group and press Add.

To remove a name from a caller group, scroll to the name you want to remove, and press Options and select Remove name.

Profiles (Menu 4)
Your phone has various setting groups, profiles, for which you can customise the phone tones for different events and environments. Initially, personalise the profiles to your own liking and then you only need to activate a profile to use it. Available profiles are General, Silent, Meeting, Outdoor, and Pager.

Press Menu, and select Profiles. Scroll to a profile and press Select.

- To activate the selected profile, select Activate.
Menu functions

- To set the profile to be active for a certain amount of time up to 24 hours, select Timed and set the end time. When the time set for the profile expires, the previous profile that was not timed, becomes active.

- To personalise the profile, select Personalise. Select the setting you want to change and make the changes. The same settings can also be changed in the Tone settings menu, see "Tone settings" on page 42.

To rename a profile, Profile name. The General profile can not be renamed.

Tip: To change the profile quickly in standby mode, press the power key , scroll to the profile you want to activate and press Select.

1. Press Menu, and select Settings and Right selection key.

- To select desired functions for the right selection key, select Select options and the list of available functions is shown.
To add the desired function to the selection key list, press Mark. When a function is added to the list, the right selection key changes from Names to Go to.
To remove a function from the list, press Unmark.
- To rearrange the functions in the list, select Organise and then the desired function. Press Options and select an option to move the function in the list.

2. When you have made all the changes, press Done. To save the changes, press Yes or to discard the changes, press No.

Time and date settings

Clock
Press Menu, and select Settings, Time and date settings and Clock.
Select Show clock (or Hide clock) to show (or hide) the time on the top right of the display in standby mode. Select Set the time to adjust the clock to the correct time, and Time format to select 12-hour or 24-hour time format.
The clock serves the functions Messages, Call register, Alarm clock, timed Profiles, Calendar and screen saver, for example.

If the battery is removed from the phone for a long time, you may need to set the time again.

**Date**
Press Menu, and select Settings, Time and date settings and Date.
Select Show date (or Hide date) and the date is shown (or hidden) on the display when the phone is in standby mode. Select Set the date to adjust the date. You can also select the date format.

**Auto update of date and time**
Press Menu, and select Settings, Time and date settings and Auto-update of date & time (network service). To set the phone to automatically update the time and date according to the current time zone, select On. To set the phone to ask for a confirmation before the update, select Confirm first.

The automatic update of the date and time does not change the time that you have set for the alarm clock, calendar or the alarm notes. They are in local time. Updating may cause some alarms that you have set to expire.

**Call settings**

**Call divert**
Press Menu, and select Settings, Call settings and Call divert (network service). With call divert, you can direct your incoming calls to another number, for example, to your voice mailbox number. For details, contact your service provider. Divert options not supported by your SIM card or your network operator may not be shown.

Select the divert option you want, for example, select Divert if busy to divert the voice calls when your number is busy or when you reject an incoming call.

To set the divert setting to on, select Activate and then select the timeout after which the call is diverted, if this is available for the divert option. To set the divert setting to off, select Cancel, or select Check status, if this is available for the divert option, to check whether call divert is activated or not. Several divert options may be active at the same time.

To see the divert indicators in standby mode, see “Standby mode” on page 2.
Menu functions

Anykey answer
Press Menu, and select Settings, Call settings and then Anykey answer. Select On and you can answer an incoming call by briefly pressing any key, except 0, selection keys *, and #.

Automatic redial
Press Menu, and select Settings, Call settings and Automatic redial. Select On and your phone will make a maximum of ten attempts to connect the call after an unsuccessful call attempt.

Speed dialling
Press Menu, and select Settings, Call settings and Speed dialling. Select On and the names and phone numbers assigned to the speed dialling keys, from #2 to #9, can be dialled by pressing and holding the corresponding number key.

Call waiting
Press Menu, and select Settings, Call settings and Call waiting. Select Activate and the network will notify you of an incoming call while you have a call in progress (network service). See “Call waiting” on page 11.

Summary after call
Press Menu, and select Settings, Call settings and Summary after call. Select On and the phone will after each call briefly display the duration and cost (network service) of the call.

Send my caller identity
Press Menu, and select Settings, Call settings and Send my caller identity. Select Yes and your phone number will be displayed to the person you are calling (network service). Select Set by network and the setting agreed upon with your service provider is used.

Line for outgoing calls
Line for outgoing calls is a network service to select the phone line 1 or 2, that is, the subscriber number, for making calls.

Press Menu, and select Settings, Call settings and Line for outgoing calls. If you select Line 2 and have not subscribed to this network service, you will not be able to make calls. However, calls on both lines can be answered regardless of the selected line. If supported by your SIM card, you can prevent the line selection by selecting the option Lock.

For more information on availability, contact your network operator or service provider.
Tip: In standby mode, you can switch from one line to the other by pressing and holding .

Phone settings

Language
Press Menu, and select Settings, Phone settings and Language.
Select the language for the display texts. If Automatic is selected, the phone selects the language according to the information on the SIM card.

Memory info
Press Menu, and select Settings, Phone settings and Memory status.
Scroll to view the free memory, the total used memory and the used memory for each function.
You may also find the memory information in the menu of some of those functions, for example in gallery.

Automatic keyguard
Note: When Keyguard is on, calls may be possible to the emergency number programmed into your phone (e.g. 112, 911 or other official emergency number). Key in the emergency number and press . The number is displayed only after you have keyed in its last digit.

You can set the keypad of your phone to lock automatically after a preset time delay when the phone is in standby mode and no function of the phone has been used.
Press Menu, and select Settings, Phone settings and Automatic keyguard.
- To activate the automatic keyguard, select On and the phone displays Set delay: Key in the time and press OK. You can set the time from 10 seconds to 60 minutes
- To deactivate the automatic keyguard, select Off.
Refer also to “Keypad lock (Keyguard)” on page 7.

Cell info display
Press Menu, and select Settings, Phone settings and Cell info display. Select On to set the phone to indicate when it is used in a cellular network based on Micro Cellular Network (MCN) technology.
If the GPRS connection is set to Always online, the cell identity may not be received. In that case, set the GPRS connection to When needed, see “GPRS connection” on page 62.
Menu functions

Welcome note
Press Menu, and select Settings, Phone settings and Welcome note. Key in the note you would like to be shown briefly when the phone is switched on. To save the note, press Options, and select Save.

Network selection
Press Menu, and select Settings, Phone settings and Network selection. Select Automatic and the phone automatically selects one of the cellular networks available in your area.

If you select Manual, you can select a network that has a roaming agreement with your home network operator. If No access is displayed, you must select another network. The phone stays in manual mode until the automatic mode is selected or another SIM card is inserted into the phone.

Confirm SIM service actions
See “SIM services (Menu 15)” on page 71.

Help text activation
To set the phone to show or not to show the help texts, press Menu, and select Settings, Phone settings and Help text activation.

See also “Using the menu” on page 16.

Start-up tone
To set the phone to play or not to play a start-up tone when the phone is switched on, press Menu, and select Settings, Phone settings and Start-up tone.

Display settings

Wallpaper
You can set your phone to display a background image, known as wallpaper, when the phone is in standby mode. Some images are presaved in the Gallery menu. You can also receive images via multimedia messages, download them from WAP pages or transfer them with PC Suite from your PC and then save them in Gallery. Your phone supports JPEG, GIF, BMP and PNG formats.

To select wallpaper
1. Press Menu, and select Settings, Display settings and Wallpaper.
2. Select Change image and the folder list in the Gallery menu will be shown.
3. Open an image folder and scroll to the desired image.
4. To set the image as wallpaper, press Options and select Set as wallpaper.
Note that the wallpaper is not displayed when the phone activates the screen saver.

To activate or deactivate the wallpaper
Press Menu, and select Settings, Display settings and Wallpaper. To activate/deactivate the wallpaper, select On/Off, respectively.

Colour schemes
You can change the colour in some display components, for example, indicators and signal bars.
Press Menu, and select Settings, Display settings and Colour schemes. Select the desired colour scheme.

Operator logo
To set your phone to display or hide the operator logo, press Menu, and select Settings, Display settings and Operator logo. If you have not saved the operator logo, the Operator logo menu is dimmed.
Note that the operator logo is not displayed when the phone activates the screen saver.
For more information on availability of an operator logo via SMS, MMS or WAP, contact your network operator or service provider. See also "PC Suite" on page 72.

Screen saver
Digital clock screen saver is used for power saving in standby mode. It is activated when no function of the phone has been used for a certain time. Press any key to deactivate the screen saver. The screen saver is also deactivated when the phone is out of the network coverage area.
Press Menu, and select Settings, Display settings and Screen saver timeout. Select the timeout after which the digital clock display will be activated. The length of the timeout can vary from 5 seconds to 60 minutes.
Note that the screen saver overrides all the graphics and texts on the display in standby mode.

Display brightness
You can change the display brightness level used on the phone display.
Press Menu, and select Settings, Display settings and Display brightness. Scroll with and to decrease and increase the brightness level, and press OK to accept it.
Menu functions

Tone settings
Press Menu, and select Settings and then Tone settings. You can find the same settings in the Profiles menu, see “Profiles (Menu 4)” on page 35. Note that the settings you make, will change the settings in the active profile.
Select Incoming call alert to choose how the phone notifies you of an incoming voice call. The options are Ringing, Ascending, Ring once, Beep once and Off.
Select Ringing tone for incoming voice calls. To select ringing tones that have been saved in the Gallery, select Open gallery from the ringing tone list.
Select Ringing volume and Vibrating alert for incoming voice calls and messages. The vibrating alert does not work when the phone is connected to a charger, a desktop stand, or a car kit.
Tip: If you receive a ringing tone via infrared connection or by downloading, you can save the ringing tone in the Gallery.

Select Message alert tone to set the alert tone for the incoming messages, Keypad tones, or Warning tones to set the phone to sound tones for example, when the battery is running out of power.
Select Alert for to set the phone to ring only upon calls from phone numbers that belong to a selected caller group. Scroll to the caller group you want or All calls and press Mark.

Accessory settings
Accessory settings menu is shown only if the phone is or has been connected to one of the following accessories: headsets HDB-4 or HDS-3, handsfree unit CARK126, or mobile inductive loopset LPS-4.
Press Menu, and select Settings and Accessory settings. You can select Headset, Handsfree, Loopset, or Music stand, if the corresponding accessory is or has been connected to the phone.
• Select Default profile to select the profile that you want to be automatically activated when you connect to the selected accessory. You can select another profile while the accessory is connected.
• Select **Automatic answer** to set the phone to answer an incoming call automatically after five seconds. If the **Incoming call alert** is set to **Beep once or Off**, automatic answer will not be in use.

• Select **Lights** to set the lights permanently **On**. Select **Automatic** to set the lights on for 15 seconds after a keypress. The **Lights** option is available only when **Handsfree** is selected.

**Security settings**

Note: When security features that restrict calls are in use (call barring, closed user group and fixed dialling), calls may be possible to certain emergency numbers in some networks (e.g. 112, 911 or other official emergency numbers).

Press **Menu**, and select **Settings** and **Security settings**. Select

• **PIN code request** to set the phone to ask for your PIN code every time the phone is switched on. Some SIM cards do not allow the PIN code request to be turned off.

• **Call barring service** (network service) to restrict incoming calls to and outgoing calls from your phone. A barring password is required.

• **Fixed dialling** to restrict your outgoing calls and text messages to selected phone numbers if this function is supported by your SIM card. The PIN2 code is required.

  When the fixed dialling is on, GPRS connections are not possible except while sending text messages over a GPRS connection. In this case, the recipient's phone number and the message centre number have to be included on the fixed dialling list.

• **Closed user group**. Closed user group is a network service that specifies the group of people whom you can call and who can call you. For more information contact your network operator or service provider.

• **Security level**. Select **Phone** and the phone will ask for the security code whenever a new SIM card is inserted into the phone.
Menu functions

Select Memory and the phone will ask for the security code when the SIM card's memory is selected and you want to change the memory in use, (see "Selecting the phone book settings" on page 30) or copy from one memory to another ("Copying phone books" on page 33).

- **Access codes** to change the security code, PIN code, PIN2 code or barring password. Codes can only include numbers from 0 to 9.

**Restore factory settings**

To reset some of the menu settings to their original values, press Menu, and select Settings and Restore factory settings. Key in the security code and press OK. Note that the data you have keyed in or downloaded, for example, the names and phone numbers saved in the phone book are not deleted.

**Radio**

(Menu 6)

Note: Your phone must be switched on to use this function. Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

To listen to the radio on your phone connect the headset HDS-3 (stereo) or HDB-4 (mono) to the headset connector on the bottom of the phone. The lead of the headset functions as the radio antenna, so let it hang freely.

Note that the quality of the radio broadcast depends on the radio station's coverage in that particular area.

1. To turn on the radio, press Menu and select Radio. On the display are
   - Channel location number and the name of the radio channel if you have saved the channel.
   - Frequency of the radio channel.

2. If you have already saved radio channels, you can scroll to the channel you would like to listen to, or select a radio channel location 1 to 9 by pressing the corresponding number key.

   When using the headset HDB-4 and HDS-3, press the headset key to scroll to the desired saved radio channel.

3. When the radio is on, press Options and select Switch off to turn off the radio.

Tip: To quickly turn off the radio, press and hold .
Tuning a radio channel
When the radio is on, press and hold  or  to start the channel search. Searching stops when a channel is found. To save the channel, press Options, and select Save channel. Key in the name of the channel and press OK. Select the location where you want to save the channel.

Tip: To quickly save the channel in a location 1 to 9, press and hold the corresponding number key, then key in the name of the channel and press OK.

Using the radio
When the radio is on, press Options and select

- **Switch off** to turn off the radio.
- **Save channel** to save the radio channel you have found, refer to “Tuning a radio channel” above. Up to 20 radio channels can be saved.
- **Automatic tuning.** Briefly press  or  to start the channel search upwards or downwards. The search stops when a channel has been found, press OK. To save the channel, see Save channel above.

- **Manual tuning.** Briefly press  or  to move the channel search 0.1 MHz upwards or downwards or press and hold down the keys to quickly search upwards or downwards for a channel. To save the channel, press OK and see Save channel above.

Tip: To quickly select Manual tuning, press  when in the Radio menu.
- **Set frequency.** If you know the frequency of the radio channel you would like to listen to (between 87.5 MHz and 108.0 MHz), key it in and press OK. To save the channel, see Save channel above.

Tip: To quickly select Set frequency, press  when in the Radio menu.
- **Delete channel.** To delete a saved channel, scroll to it, press Delete, and OK.
- **Rename.** Key in a new name for the saved channel and press OK.
- **Loudspeaker** (or Headset) to listen to the radio using the loudspeaker (or headset). Keep the headset connected to the phone. The lead of the headset functions as the radio antenna.
Menu functions

- **Mono output** (or **Stereo output**) to listen to the radio in mono (or in stereo).

You can normally make a call or answer an incoming call while listening to the radio. The volume of the radio is muted. When you end the call, the radio will automatically be turned on.

When an application using a GPRS or HSCSD connection is sending or receiving data, it may interfere with the radio.

## Camera
(Menu 7)

**Note:** Your phone must be switched on to use this function. Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

**Note:** Obey all local laws governing the taking of pictures. Do not use this feature illegally.

In this menu you can take photos with the phone’s built-in camera and adjust its settings. The camera lens is on the back of the phone, and the display of the phone works as a viewfinder. The camera produces JPEG pictures.

If there is not enough memory to take a new photo, you need to free some by deleting old photos or other files in the gallery. Note that the camera uses shared memory, see “Shared memory” on page xvi.

### To take a photo

1. Press **Menu**, and select **Camera** and **Standard photo** or **Portrait photo**.

   **Tip:** To quickly open the camera viewfinder with standard photo view, press in standby mode.

2. The live image appears on the display, and you can use the display as a viewfinder.

3. To take a photo, press **Capture**.

   When taking a photo, a shutter sound is heard. The phone saves the photo in the **Photos** folder of the **Gallery** menu. The saved photo will be shown on the display.

   To define the default title for the photo, see **Default title** in "Camera settings" on page 47.

4. Select **Back** to take another photo or press **Options** and select, for example, an option to delete or rename the saved photo, send it as a multimedia message or access the gallery.
**Menu functions**

**Tip:** To activate the self timer of the camera, press **Menu**, and select **Camera, Self-timer** and **Standard photo** or **Portrait photo**. Press **Start**, and after the timeout, the camera takes the photo and saves it in the **Gallery** menu. While the self timer is running, a beeping sound is heard.

**Camera settings**
Press **Menu**, and select **Camera and Settings**: Select

- **Image quality** to define how much the photo file will be compressed when saving the image. Select **High, Normal or Basic**. **High** provides the best image quality but takes more memory.
- **Camera sounds** to set the shutter sound and the self timer tone to **On or Off**.
- **Default title** to define the title that will be used when saving a photo. If you select **Automatic**, the default title will be used, or if you select **My title**, you can key in or edit a new title.

### Gallery (Menu 8)

**Note:** Your phone must be switched on to use this function. Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

You can save images and ringing tones, for example, that have been received in multimedia messages in the folders of the gallery, see "Reading and replying to a multimedia message" on page 23.

The gallery uses shared memory, see "Shared memory" on page xvi.

1. Press **Menu** and select **Gallery**.
2. The list of options is shown.
3. Select **View folders** to open the list of folders.
4. Other available options are:
   - **Add folder** to add a new folder. Key in a name for the folder and press **OK**.
   - **Delete folder** to select the folder you want to delete. You cannot delete the original folders on the phone.
   - **Rename folder** to select the folder you want to rename. You cannot rename the original folders on the phone.
**Menu functions**

- **Gallery services** to download more images and tones. Select *Image services* or *Tone services*, respectively. The list of available WAP bookmarks is shown. Select *More bookmarks* to access the list of WAP bookmarks in the *Services* menu, see "Bookmarks" on page 67.

Select the appropriate bookmark to connect to the desired WAP page. If the connection fails, you may not be able to access the WAP page from the WAP service whose connection settings are currently active. In this case, enter the *Services* menu and activate another set of service settings, see “Making a connection to a WAP service” on page 64. Try again to connect to the WAP page.

For the availability of different WAP services, pricing and tariffs, contact your network operator and/or the WAP service provider.

3. Open the desired folder and the list of files in the folder is shown. *Photos*, *Graphics* and *Tones* are the original folders in the phone.

4. Scroll to the desired file. Press *Options* and some of the following options are available:

- *Open* to open the selected file.
- *Delete* to delete the selected file.
- *Send* to send the selected file via MMS.
- *Move* to move a file to another folder.
- *Rename* to give a new name to the file.
- *Set as wallpaper* to set the selected file as wallpaper.
- *Set as ring tone* to set the selected file as the ringing tone.
- *Details* to see the details of the file, for example the size of the file.
- *Sort* to sort the files and folders by date, type, name or size.
Organiser
(Menu 9)

Note: Your phone must be switched on to use the functions in the Organiser menu. Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

Alarm clock
The alarm clock uses the time format set for the clock. The alarm clock works even when the phone is switched off.

Press Menu, and select Organiser and Alarm clock.

- Select Alarm time, key in the alarm time and press OK.
  To change the alarm time, select On.
- Select Alarm tone and select the default alarm tone or the radio.
  To select the radio as an alarm tone, connect the headset to the phone.
  If you select the radio, the phone uses the latest listened channel as an alarm tone via loudspeaker.
  If the headset is removed, the default alarm tone will be used instead of the radio.

When the alarm time expires
The phone will sound an alert tone, and flash Alarm! and the current time on the display.

Press Stop to stop the alarm. If you let the phone continue to sound the alarm for a minute or press Snooze, the alarm stops for about ten minutes and then resumes.

If the alarm time is reached while the phone is switched off, the phone switches itself on and starts sounding the alarm tone. If you press Stop, the phone asks whether you want to activate the phone for calls, Switch the phone on?. Press No to switch off the phone or Yes to make and receive calls.

Note: Do not press Yes when wireless phone use is prohibited or when it may cause interference or danger.

Calendar
The calendar helps you to keep track of reminders, calls that you need to make, meetings, and birthdays.

The calendar uses shared memory, see "Shared memory" on page xvi.

Press Menu, and select Organiser and Calendar.

Tip: To quickly open the Calendar menu, press in standby mode.
Menu functions

Scroll to the day you want. The current day is indicated by a frame around the day. If there are any notes set for the day, the day is in bold type. To view the day notes, press Options and select Day notes.

To view a single note, scroll to the note you want to view, press Options and select View. The note view allows you to view the details of the selected note. You can scroll through the note.

The other options for the calendar views may include:

- Options for making a note, or for sending a note via IR, or as a note directly to another phone’s calendar or as a text message.
- Options for deleting, editing, moving and repeating a note and for copying a note to another day.
- Settings to set the date, time, date or time format, or the first day of the week. In the Auto-delete option you can set the phone to delete old notes automatically after a specified time. However, the repeat notes, for example, birthday notes, will not be deleted.

Making a calendar note
For keying in letters and numbers, see “Writing text” on page 13.

Press Menu, and select Organiser and Calendar. Scroll to the date you want, press Options and select Make a note. Select one of the following note types:

- Meeting – Key in the note (or press Options and search for the name in the phone book). Press Options and select Save. Key in the location for the meeting and press Options and select Save. Key in the start time for the meeting and press OK, and then the end time and press OK. To set the alarm for the note, select With tone or Silent (no alarm tone) and then set the alarm time.

- Call – Key in the phone number, press Options and select Save. Key in the name, press Options and select Save. (Instead of keying in the phone number, press Options to search for the name and number in the phone book.) Then key in the time for the call and press OK. To set the alarm for the note, select With tone or Silent (no alarm tone) and then set the alarm time.
• 🎂 Birthday – Key in the person’s name (or press Options and search for it in the phone book), press Options and select Save. Then key in the year of birth, and press OK. To set the alarm for the note, select With tone or Silent (no alarm tone) and then set the alarm time.

• 📀 Memo – Key in the note, press Options and select Save. Key in the end day for the note and press OK. To set the alarm for the note, select With tone or Silent (no alarm tone) and then set the alarm time.

• ⌠ Reminder – Key in the subject for the reminder, press Options and select Save. To set the alarm for the note, select Alarm on and then set the alarm time. When you have set the alarm, the indicator 🕒 is displayed when you view the notes.

When the phone sounds an alarm for a note
The phone beeps, and displays the note. With a call note 📞 on the display, you can call the displayed number by pressing 📞. To stop the alarm and view the note, press View. To stop the alarm without viewing the note, press Exit.

To-do list
You can save a note for a task that you have to do, select a priority level for the note and mark it as done when you have completed it. You can sort the notes by priority or by date.

The to-do list uses shared memory, see “Shared memory” on page xvi. Press Menu, and select Organiser and To-do list and the list of notes is shown. Press Options, or scroll to the desired note and press Options.

• To add a new note, select Add. Key in the subject for the note. When you have keyed in the maximum number of characters for a note, no further characters are accepted. Press Options and select Save. Select the priority for the note, High, Medium, or Low. The phone automatically sets the deadline without an alarm for the note.

Dictionary, refer to “Setting predictive text input on or off” on page 13.

• You can also view and delete the selected note and delete all the notes that you have marked as done. You can sort the notes by priority or by deadline, send a note to another phone, save a note as a calendar note, or access the calendar.
Menu functions

While viewing a note, you can also, for example, select an option to edit the selected note, edit the deadline or priority for the note, or mark the note as done.

Games (Menu 10)

Note: Your phone must be switched on to use this function. Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

Launching a game

1. Press Menu, and select Games and Select game.
2. Scroll to a game or a game set (the name depends on the game).
3. Press Options and select Open or press \( \text{\textless} \) . If the selection is a single game it will be launched. Otherwise, a list of games in the selected game set is displayed. To launch a single game, scroll to the desired game and press Options and select Open, or press \( \text{\textless} \).

Note that running some games may consume the phone’s battery faster (and you may need to connect the phone to the charger).

Other options available for a game or game set

Options for games, see “Other options available for an application or application set” on page 53 .

Game services

Press Menu, and select Games and Game services. The list of available WAP bookmarks is shown. Select More bookmarks to access the list of WAP bookmarks in the Services menu, see “Bookmarks” on page 67. Select the appropriate bookmark to connect to the desired WAP page. If the connection fails, you may not be able to access the WAP page from the WAP service whose connection settings are currently active. In this case, enter the Services menu and activate another set of service settings, see “Making a connection to a WAP service” on page 64. Try again to connect to the WAP page.

For the availability of different WAP services, pricing and tariffs, contact your network operator and/or the WAP service provider.
To download more games, refer also "Downloading an application" on page 54.
Note that when downloading a game, it may be saved in the Applications menu instead of the Games menu.

Memory status for games
To view the amount of memory available for game and application installations, press Menu, and select Games and Memory. See also "Memory status for applications" on page 55.
The games use shared memory, see "Shared memory" on page xvi.

Game settings
Press Menu, and select Games and Settings to set sounds, lights and shakes for the game.

■ Applications
(No. 11)

Note: The phone must be switched on to use this function. Do not switch on the phone when the use of a wireless phone is prohibited or when it may cause interference or danger.

■ Launching an application
1. Press Menu, and select Applications and Select application.
2. Scroll to an application or an application set (the name depends on the application).
3. Press Options and select Open or press . If the selection is a single application it will be launched.
   Otherwise, a list of applications in the selected application set is displayed. To launch a single application, scroll to the desired application and press Options and select Open, or press .
   Note that running some applications may consume the phone's battery faster (and you may need to connect the phone to the charger).

Other options available for an application or application set
- Delete to delete the application or application set from the phone.
Menu functions

Note that if you delete a pre-installed application or an application set from your phone, you may download it again to your phone from the Nokia Software Market, www.softwaremarket.nokia.com/wap.

- **Web access** to restrict the application for accessing the network. Select **Ask first** and the phone asks for net access, **Allowed** to allow the net access, or **Not allowed** not to allow the net access.

- **Check version** to check if a new version of the application is available for download from the WAP services.

- **Web page** to provide further information or additional data for the application from an Internet page. This feature needs to be supported by the network. It is only shown if an Internet address has been provided with the application.

- **Details** to give additional information about the application.

**Downloading an application**

You can download new Java applications in different ways:

- Press **Menu**, and select **Applications** and **App. services** and the list of available WAP bookmarks is shown. Select **More bookmarks** to access the list of WAP bookmarks in the **Services** menu, see "Bookmarks" on page 67.

  Select the appropriate bookmark to connect to the desired WAP page. If the connection fails, you may not be able to access the WAP page from the WAP service whose connection settings are currently active. In this case, enter the **Services** menu and activate another set of service settings, see "Making a connection to a WAP service" on page 64. Try again to connect to the WAP page.

  For the availability of different WAP services, pricing and tariffs, contact your network operator and/or the WAP service provider.
• Press Menu, and select Services to find a WAP page to download an appropriate Java application. See “Browsing the pages of a WAP service” on page 65.

• Use the game download functionality, see “Game services” on page 52.

• Use the Nokia Application installer from PC Suite to download the applications in your phone.

Note that Nokia does not warrant for applications from non-Nokia sites. If you choose to download Java applications from them, you should take the same precautions, for security or content, as you would with any site.

Note that when downloading an application, it may be saved in Games menu instead of the Applications menu.

Memory status for applications
To view the amount of memory available for game and application installations, press Menu, and select Applications and Memory.

The applications use shared memory, see “Shared memory” on page xvi.

■ Extras
(Menu 12)

Note: Your phone must be switched on to use the functions in Extras menu. Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

Calculator
The calculator in your phone adds, subtracts, multiplies, divides, calculates the square and the square root and converts currency values.

This calculator has a limited accuracy and rounding errors may occur, especially in long divisions.

1. Press Menu, and select Extras and Calculator.

2. When '0' is displayed on the screen, key in the first number in the calculation, press  for a decimal point.

3. Press Options and select Add, Subtract, Multiply, Divide, Square, Square root or Change sign.
Menu functions

Tip: Alternatively, press $+$ once to add, twice to subtract, three times to multiply or four times to divide.
4. Key in the second number.
5. For a total, press Options and select Equals. Repeat steps 3 to 5 as many times as is necessary.
6. To start a new calculation, first press and hold Clear.

Performing a currency conversion
1. Press Menu, and select Extras and Calculator.
2. To save the exchange rate, press Options and select Exchange rate. Select either of the displayed options. Key in the exchange rate, press $\div$ for a decimal point, and press OK. The exchange rate remains in the memory until you replace it with another one.
3. To perform the currency conversion, key in the amount to be converted, press Options and select In domestic or In foreign.

Tip: You can also perform the currency conversion in standby mode. Key in the amount to be converted, press Options and select In domestic or In foreign.

Countdown timer
Press Menu, and select Extras and Countdown timer. Key in the alarm time in hours and minutes and press OK. If you wish, write your own note text which is displayed when the time expires, and press OK to start the countdown timer.
- To change the countdown time, select Change time, or to stop the timer, select Stop timer.
If the alarm time is reached when the phone is in standby mode, the phone sounds a tone and flashes the note text if it is set or else Countdown time up. Stop the alarm by pressing any key. If no key is pressed, the alarm automatically stops within 30 seconds. To stop the alarm and to delete the note text, press OK.

Stopwatch
You can measure time, take intermediate times or lap times using the stopwatch. During timing, the other functions of the phone can be used. To set the stopwatch timing in the background, press .
Using the stopwatch consumes the battery and the phone's operating time will be reduced. Be careful not to let it run in the background when performing other operations with your phone.

**Time observation and time splitting**

1. Press **Menu**, and select **Extras**, **Stopwatch** and **Split timing**. You can select **Continue** if you have set the timing in the background.
2. Press **Start** to start the time observation. Press **Split** every time you want to take an intermediate time. The intermediate times are listed below the running time on the display. Scroll to view the times.
3. Press **Stop** to stop the time observation.
4. Press **Options** and select **Start** to start the time observation again. The new time is added to the previous time.
   - **Save** to save the time. Key in a name for the measured time and press **OK**. If no name is keyed in, the total time is used as the title.
   - **Reset** to reset the time without saving it.

**Lap times**

Press **Menu**, and select **Extras**, **Stopwatch** and **Lap timing**. Press **Start** to start the time observation and **Lap** to take a lap time. Press **Stop** to stop the lap timing. Press **Options** and you can save or reset the lap times. Refer to "Time observation and time splitting" above.

**Viewing and deleting times**

Press **Menu**, and select **Extras**, and **Stopwatch**.

If the stopwatch is not reset, you can select **Show last** to view the most recent measured time. Select **View times** and a list of names or final times of the time sets is shown, select the time set you want to view.

To delete the saved times, select **Delete times**. Select **All at once** and press **OK**, or select **One by one**, scroll to the times you want to delete, press **Delete** and press **OK**.

**Wallet**

In **Wallet** you can save personal information, for example, credit cards and make purchases with your phone.

You can access wallet via the **Wallet** menu or via the WAP browser, see "Options while browsing" on page 66.
Menu functions

When you access wallet for the first time, you need to create your own wallet code. At Create wallet code: key in the code and press OK to confirm it and at Verify wallet code: key in the code again and press OK.

If you want to delete all the content of the wallet and the wallet code, key in *#7370925538# (*#res0wallet# in letters) in standby mode. You also need the phone's security code.

See also "Access codes" on page xii.

Saving and changing personal card information

To access the wallet, press Menu, select Extras and Wallet. If required, key in your wallet code and press OK, see "Wallet settings" on page 59. Select Cards to view the list of cards. The maximum number of cards is five. Scroll to the desired card.

- To save information on a card, press Options and select View. Select
  - Card info to key in, for example, card holder's name, card type, number and expiry information.
  - User info to save user name and password.
  - Shipping info to save your contact information.
  - Billing info to save the contact information in case the invoicing address differs from your own, for example, with company credit cards.
  - Receipt info to save phone numbers and e-mail addresses where you want the service provider to send a receipt of your purchase.

- To make a copy of the card, press Options and select Copy card.
- To delete all the information on the card, press Options and select Clear card.
- To rename the card, press Options and select Rename card.

Personal notes

You can save up to 30 confidential personal notes, for example, passwords, codes or notations.

Press Menu, select Extras, Wallet and Personal notes. Press Options and you can view, add, edit a selected note and sort notes either by name or date. Send as text copies the note as a text message. Copy to calendar copies the note to the calendar as a memo. Use detail extracts numbers from a note.
Wallet settings
Press Menu, select Extras, Wallet and Settings. Select
- Code request to set the wallet code request to on or off. You need to key in the correct wallet code before you can set the code request to on or off.
- Change code to change the wallet code.

Guidelines for paying for your purchases with wallet
1. Access the desired WAP site to do your shopping, see "Making a connection to a WAP service" on page 64, and choose the product you want to buy.
2. To pay for the items you wish to purchase, press Options and select Use wallet info. See “Options while browsing” on page 66.
3. Select the card you want to pay with. Fill in the data form you receive from the service provider by transferring the credit card details from the wallet. If you want to fill in all the fields automatically, select Fill in all fields. The option is shown only when the WAP service supports the Electronic Commerce Modeling Language standard. You can also fill the form by selecting information fields from the card one by one. The phone displays the filled form.
4. Approve the purchase, and the information is sent forward.
5. You may receive a sign-in document from the WAP service that you need to sign to make the purchase binding, see “Digital signature” on page 70.
6. To close the wallet, select Close wallet. See “Options while browsing” on page 66.

Synchronisation
You can save your calendar and phone book data in a remote Internet server or in a compatible PC. If you have saved data in the remote Internet server, you can synchronise your phone by starting the synchronisation from your phone. You can also synchronise the data in your phone's phone book and calendar to correspond with the data of your PC by starting the synchronisation from your PC. The phone book in your SIM card will not be synchronised.

Note that answering an incoming call during synchronisation will end the synchronisation and you need to start it again.
Synchronising from your phone

Before synchronising from your phone, you may need to do the following:

- Subscribe to a synchronisation service. For more information on availability and the synchronisation service settings, contact your network operator or service provider.

- Retrieve the synchronisation settings from your network operator or service provider. You may receive the synchronisation settings as a text message, see “Saving the synchronisation settings received as a text message” on page 60 or you may have to key in the settings manually, see “Keying in the synchronisation settings manually” on page 60.

To start the synchronisation from your phone:

1. Press Menu, and select Services, Active service settings and select the connection settings you need for synchronisation.

   The synchronisation settings may differ from the service settings required for WAP browsing. After synchronising, change your Active service settings back to the previous ones if you want to use other WAP services later.

2. Mark the data to be synchronised. See Data to be synchronised in “Keying in the synchronisation settings manually” on page 60.

3. Press Menu, and select Extras, Synchronise and Synchronise.

4. The marked data of the active set will be synchronised after confirmation.

Note that synchronising for the first time or after an interrupted synchronisation may take time up to 30 minutes, if the phone book or calendar are full.

Saving the synchronisation settings received as a text message

When you receive the synchronisation settings as a text message, Synchronisation settings received is displayed.

Press Options and select Details to view the received settings first, Save to save the synchronisation settings, or Discard to discard them.

Keying in the synchronisation settings manually

Press Menu, select Extras, Synchronise and Settings.

Select Active Internet sync. settings.
You need to activate the set where you want to save the synchronisation settings. A set is a collection of settings required to make a connection to a service. Scroll to the set you wish to activate and press **Activate**.

Select **Edit active Internet sync. settings**. Select each setting one by one and key in all the required settings.

- **Settings’ name**. Key in the name for the set and press **OK**.
- **Data to be synchronised**. Mark the data you want to synchronise, *Phone book* or/and *Calendar*, and press **Done**.
- **Database addresses**. Select *Phone book database* or/and *Calendar database* to be edited. Key in the name of the database and press **OK**.
- **User name**. Key in the user name and press **OK**.
- **Password**. Key in the password and press **OK**.
- **Synchronisation server**. Key in the name of the server and press **OK**.

### Synchronising from your PC

To synchronise the phone book and calendar from your PC, use either an IR connection or a data cable. You also need the PC Suite software of your phone installed on your PC. Start the synchronisation from your PC using PC suite. After synchronising, the data in the phone and in the PC are the same.

#### Connectivity (Menu 13)

**Infrared**

You can set up the phone to receive data through its infrared (IR) port. To use an IR connection, the device with which you want to establish a connection must be IrDA compliant. You can send or receive data such as business cards and calendar notes to or from a compatible phone or data device (for example, a computer) via the IR port of your phone.

Do not point the IR (infrared) beam at anyone’s eye or allow it to interfere with other IR devices. This device is a Class 1 Laser product.

Note: Your phone must be switched on to use this function. Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.
Sending and receiving data via IR

- Ensure that the IR ports of the sending and receiving devices are pointing at each other and that there are no obstructions between the devices. The preferable distance between the two devices in an infrared connection is one meter at most.

- To activate the IR port of your phone to receive data via IR, press Menu, and select Connectivity and Infrared.

- The user of the sending phone selects the desired IR function to start data transfer.

 If data transfer is not started within two minutes after the activation of the IR port, the connection is cancelled and has to be started again.

IR connection indicator

- When the indicator is shown continuously, the IR connection is activated and your phone is ready to send or receive data via its IR port.

- When the indicator blinks, your phone is trying to connect to the other device or a connection has been lost.

GPRS

GPRS connection

You can set the phone to automatically register to a GPRS network when you switch the phone on. Press Menu, and select Connectivity, GPRS, GPRS connection and Always online. When you start an application using GPRS, the connection between phone and network is established, and data transfer is possible. When you end the application, the GPRS connection is ended but the registration to the GPRS network remains.

If you select When needed, the GPRS registration and connection are established when an application using GPRS need it and is closed when you end the application.

GPRS modem settings

You can connect the phone via an infrared or a data cable connection to a compatible PC and use the phone as a modem to enable GPRS connectivity from the PC.

Press Menu, and select Connectivity, GPRS and GPRS modem settings. Select Active access point and activate the access point you want to use. Select Edit active access point to change the access point settings.
• Select **Alias for access point**. Key in the name you would like for the activated access point and press **OK**.

• Select **GPRS access point**. Key in the Access Point Name (APN) to establish a connection to a GPRS network and press **OK**. Contact your network operator or service provider for the access point name.

You can also set the GPRS dial-up service settings (Access Point Name) on your PC using the Nokia Modem Options software, see "PC Suite" on page 72. If you have set the settings both on your PC and on your phone, note that the PC's settings will be used.

**WAP services**

**Note:** Your phone must be switched on to use this function. Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

You can access various WAP services such as banking, news, weather reports and flight times. These services are specially designed for mobile phones and they are maintained by WAP service providers.

Check the availability of WAP services, pricing and tariffs with your network operator and/or the service provider whose service you wish to use. Service providers will also give you instructions on how to use their services.

The WAP services use Wireless Mark-Up Language (WML) on their WAP pages. Internet web pages cannot be viewed on your phone.

**Basic steps for accessing and using WAP services**

1. Save the service settings that are required to access the WAP service that you want to use. See page 63.

2. Make a connection to the given WAP service. See page 64.

3. Start browsing the pages of the WAP service. See page 65.

4. Once you are finished browsing, end the connection to the WAP service. See page 66.

**Setting up the phone for a WAP service**

You may receive the service settings as a text message from the network operator or service provider that offers the WAP service that you want to use. For more information, contact your network operator or service provider, or visit Club Nokia's website (www.club.nokia.com).
Menu functions

You can also key in the settings manually or add and edit the settings with PC Suite. For appropriate settings, contact your network operator or service provider. The WAP settings may be available, for example, on their website.

Saving the service settings received as a text message

When you receive the service settings as a text message, Service settings received is displayed.

- To save the received settings, press Options and select Save.
  If no settings are saved in Active service settings, the settings are saved under the first free connection set and are also activated.
  If there are settings saved in Active service settings, Activate saved service settings? will be displayed. To activate the saved settings, press Yes, or to save them only, press No.
- To discard the received settings, press Options and select Discard.
- To view the received settings first, press Options and select View. To save the settings, press Save.

Keying in the service settings manually

1. Press Menu, and select Services, and Settings.
2. Select Active service settings.
   You need to activate the set where you want to save the service settings. A set is a collection of settings required to make a connection to a WAP service.
3. Scroll to the set you would like to activate and press Activate.
4. Select Edit active service settings.
   Select each of the settings one by one and key in all the required settings according to the information you have received from your network operator or service provider.

Making a connection to a WAP service

Firstly, make sure that the service settings of the WAP service you want to use are activated. To activate the settings:

- Press Menu, and select Services and Settings. Select Active service settings and scroll to the set you want to activate and press Activate.
Secondly, make a connection to the WAP service. There are three ways to connect:

- **Open the homepage of the WAP service:**
  - Press Menu, and select Services and Home.
  - Tip: To quickly open the homepage of a WAP service, press and hold  in standby mode.

  OR

- **Select a bookmark of the WAP service:**
  - Press Menu, and select Services, Bookmarks, and select a bookmark.
  - If the bookmark does not work with the current active service settings, activate another set of service settings and try again.

  OR

- **Key in the address of the WAP service:**
  - Press Menu, and select Services and then Go to address. Key in the address of the WAP service, press for special characters, and press OK.

  Note that it is not necessary to add the prefix http:// in front of the address since it will be added automatically.

### Browsing the pages of a WAP service

After you have made a connection to the WAP service, you can start browsing its WAP pages. The function of the phone keys may vary in different WAP services. Follow the text guides on the phone display. For more information, contact your WAP service provider.

Note that if GPRS is selected as the data bearer, the indicator  is shown on the top left of the display during browsing. If you receive a call or a text message, or make a call during a GPRS connection, the indicator  will be shown on the top right of the display to indicate that the GPRS connection is suspended (on hold).

### Using the phone keys while browsing

- Use the scroll keys  or  to browse through the WAP page.
- To select a highlighted item, press .
- To enter letters and numbers, press the keys  for special characters, and press OK.
Options while browsing
Press **Options** and select one of the options available. The service provider may also offer other options. Select

- **Home** to return to the homepage of the WAP service.
- **Bookmarks**. See page 67.
- **Call | Edit | Open row | Open link | Open list** to call, to key in text or to select a highlighted item on the WAP page.
- **Add bookmark** to save the WAP page as a bookmark.
- **View image** or **View images** to view images and animations from the WAP page.
- **Go to address** to key in the address of the WAP service you want to access.
- **Service inbox**. See page 68.
- **Appear. settings**. See "Appearance settings of the WAP browser" on page 67.
- **Cookie settings**. See page 67.
- **Use detail** to extract numbers, e-mail addresses and website addresses from the WAP page.
- **Reload** to reload and update the current WAP page.
- **Clear the cache**. See "The cache memory" on page 68.
- **Security info** to view security information about the current WAP connection and the server.
- **Quit**. See "Ending a WAP connection" on page 66.

Direct calling
The WAP browser supports functions that you can access while browsing. You can make a voice call, send DTMF tones while a voice call is in progress, and save in the phone book a name and a phone number from a WAP page.

Ending a WAP connection
To quit browsing and to end the connection, press **Options** and select **Quit**. When **Quit browsing?** is shown, press **Yes**.
Alternatively, press ****. If **GSM data** is the selected data bearer, press **** twice. The phone ends the connection to the WAP service.
Menu functions

Appearance settings of the WAP browser
1. While browsing, press Options and select Appearance settings, or in standby mode, press Menu, and select Services, Settings and Appearance settings.
2. Select Text wrapping or Show images.
3. Select On or Off for Text wrapping and Yes or No for Show images.

When Text wrapping is set to On, the text continues on the next line if it cannot be shown on one line. If you select Off, the text is abbreviated if it is too long to be shown on one line.

When Show images is set to No, any pictures appearing on the WAP page are not shown. This can speed up the browsing of WAP pages that contain a lot of pictures.

Cookie settings
You can set the phone to allow or prevent the receiving of cookies.
A cookie is data that a WAP site saves in your phone’s browser cache memory. The data can be, for example, your user information or your browsing preferences. Cookies will be saved until you clear the cache memory, see “The cache memory” on page 68.

1. While browsing, press Options and select Cookie settings, or in standby mode, press Menu, and select Services, Settings and Cookie settings.
2. Select Cookies and select Allow or Reject to allow or prevent the phone receiving cookies.

Bookmarks
You can save WAP page addresses as bookmarks in the phone’s memory.
1. While browsing, press Options and select Bookmarks, or in standby mode, press Menu, and select Services and Bookmarks.
2. Scroll to the bookmark you want to use and press Options.
3. Select one of the following options:
   Go to to make a connection to the WAP page associated with the bookmark.
   View, Edit or Delete to view, modify or delete the selected bookmark.
   Send to send the selected bookmark directly to another phone select As bookmark, or to send the bookmark as a text message, select As text message.
   New bookmark to create a new bookmark without connection to the WAP service. Key in the address and the title of the WAP page and press OK.
Menu functions

Note that your phone may have some pre-installed bookmarks for sites not affiliated to Nokia. Nokia does not warrant or endorse these sites. If you choose to access them, you should take the same precautions, for security or content, as you would with any Internet site.

Receiving a bookmark
When you have received a bookmark 1 bookmark received is displayed. Press View, then press Options and select View to view the bookmark, Save to save the bookmark, or Discard to discard it.

Service inbox
The phone is able to receive service messages (pushed messages) sent by your service provider. Service messages are notifications of, for example, news headlines, and they may contain a text message or an address of a WAP service.

To access the Service inbox in standby mode, when you have received a service message, press View.

- If you press Exit the message is moved to the Service inbox. To access the Service inbox later, press Menu, and select Services, and Service inbox.
- To access the Service inbox while browsing, press Options and select Service inbox. Scroll to the message you want, press Options and select
  - Retrieve to activate the WML browser and download the marked content.
  - Details to display detailed information on the service notification.
  - Delete to delete the selected service notification.

To set the phone to receive service messages
Press Menu, and select Services, Settings, Service inbox settings, and Service messages. To set the phone to receive service messages, select On. If you select Off, the phone will not receive service messages.

The cache memory

Note: The information or services you have accessed are stored in the cache of your phone. A cache is a buffer memory, which is used to store data temporarily. If you have tried to access or have accessed confidential information requiring passwords (for example, your bank account), empty the cache of your phone after each use.
Menu functions

To empty the cache:

- while browsing, press Options
  and select Clear the cache, or
- in standby mode, press Menu,
  and select Services, and Clear the
  cache.

Browser security

Security features are required for
some WAP services, such as banking
services or shopping on a WAP site.
For such connections you need
security certificates and possibly a
security module which may be
available on your SIM card. For more
information, contact your service
provider.

Security module

The security module can contain
certificates as well as private and
public keys. The security module
provides security services for WAP
related applications, and allows you
to use a digital signature. The
certificates are saved in the security
module by the service provider.

Press Menu and select Services,
Settings and Security module
settings. Select

- Security module details to show
  the security module title, its
  status, manufacturer and serial
  number.

- Change signing PIN to select the
  signing PIN you want to change.
  Select the signing PIN you want
to change. Key in the current PIN
code, then key in the new code
twice.

See also “Access codes” on page xii.

Certificates

There are three kinds of certificates:
server certificates, authority
certificates and user certificates.

- Server certificates
  The phone uses a server
certificate to create a secure
connection to the WAP service
provider. The phone receives the
server certificate from the service
provider before the connection is
established and its validity is
checked using the authority
certificates saved in the phone.
Server certificates are not saved.
The phone indicates if the
identity of the WAP server or
WAP gateway cannot be verified,
if the WAP server or WAP
gateway certificate is not
authentic or if you do not have
the correct authority certificate
in your phone.
The security indicator ★ is displayed during a WAP connection, if the data transmission between the phone and the WAP gateway or WAP server (identified by the IP address in the Edit active service settings) is encrypted.

However, the security indicator does not indicate that the data transmission between the gateway and the content server (place where the requested resource is saved) is secure. It is up to the service provider to secure the data transmission between the gateway and the content server.

- Authority certificates
  Authority certificates are used by some WAP services, such as banking services, and for checking the validity of other certificates. Authority certificates can either be saved in the security module by the service provider, or they can be downloaded from a WAP site, if the WAP service supports the use of authority certificates. If you save the certificate, it is added to the certificate list in the phone. Authority certificates may also be available in the security module.

- User certificates
  User certificates are issued to users by a Certifying Authority. User certificates are required, for example, to make a digital signature and they associate the user with a specific private key in a security module. User certificates are saved in the security module by the service provider or you can download them to your phone from a WAP site, if supported by the security module of the SIM card.

Digital signature
You can make digital signatures with your phone. The signature can be traced back to you via the private key on the security module and the user certificate that was used to perform the signature. Using the digital signature can be the same as signing your name to a paper bill, contract or other document.

To make a digital signature, select a link on a WAP page, for example, the title of the book you want to buy and its price. The text to sign (possibly including amount, date, etc.) will be shown.

Check that the header text is Read and that the digital signature icon ★ is shown.
Note: If the digital signature icon does not appear, there is a security breach, and you should not enter any personal data such as your signing PIN.

To sign the text, read all of the text first and then you can select Sign.

Note: The text may not fit within a single screen. Therefore, make sure to scroll through and read all of the text before signing.

Select the user certificate you want to use. Key in the signing PIN (see "Access codes" on page xii) and press OK. The digital signature icon will disappear, and the WAP service may display a confirmation of your purchase.

**SIM services (Menu 15)**

In addition to the functions available on the phone, your SIM card may provide additional services that you can access in Menu 14. Menu 14 is shown only if it is supported by your SIM card. The name and contents of the menu depend entirely on the service available.

Note: For availability, rates and information on using SIM services, contact your SIM card vendor, e.g. network operator, service provider or other vendor.

You can set the phone to show you the confirmation messages sent between your phone and the network when you are using the SIM services by selecting the option Yes within the menu Confirm SIM service actions, in Phone settings.

Note that accessing these services may involve sending a text message (SMS) or making a phone call for which you may be charged.
7. PC Connectivity

You can send and receive e-mails, and access the Internet when your phone is connected to a compatible PC via an IR connection or a data cable. You can use your phone with a variety of PC connectivity and data communications applications. With PC Suite you can, for example, send text and picture messages, synchronise contacts, calendar and to-do notes between your phone and the PC, and manage your WAP bookmarks and connection sets.

You may find more information and downloadable files on the Nokia website, www.nokia.com/support/phones/7250.

PC Suite

The PC Suite contains the following applications:

- **Nokia Application Installer** to install Java applications from the PC to the phone.
- **Nokia Image Converter** to make images usable for multimedia messages, wallpaper or operator logos and to transfer them to your phone.
- **Nokia Sound Converter** to edit polyphonic ringing tones to be compatible with your phone and to transfer them to your phone.
- **Nokia Content Copier** to copy data or back-up data from your phone to a PC or to another Nokia phone.
- **Nokia PC WAP Manager** to edit and send your WAP bookmarks or update the connection sets to your phone.
- **Nokia Phone Editor** to send text messages and edit the phone book and message settings of your phone.
- **Nokia Phone Browser** to view the contents of the Gallery folder of your phone on PC.
- **Nokia PC Sync** to synchronise the phone book, calendar and to-do notes between your phone and PC.
- **Nokia PC Graphics** to create and edit picture messages for previous compatible Nokia phone models, for example, the Nokia 8310.
- **Nokia PC Composer** to create monophonic ringing tones for previous compatible Nokia phone models, for example, the Nokia 8310.
- **Nokia 7250 data modem drivers** enable you to use your phone as a modem.
Nokia Modem Options contains settings for HSCSD and GPRS connections.

Nokia Connection Manager to select the connection type between the PC and the phone.

GPRS, HSCSD and CSD
With your phone you can use GPRS (General Packet Radio Service), HSCSD (High Speed Circuit Switched Data) and CSD (Circuit Switched Data, GSM data) data services.

For availability and subscription to data services, contact your network operator or service provider.

Note that the use of HSCSD service consumes the phone’s battery faster than normal voice or data calls. You may need to connect the phone to a charger for the duration of data transfer.

See “GPRS modem settings” on page 62.

Using data communication applications
For information on using a data communication application, refer to the documentation provided with it.

1. If you use an IR connection:
   - Activate the IR connection in the phone, see “Infrared” on page 61. Make sure that the connection is active in your PC.

   If you use the cable DKU-5:
   - Connect the cable to the USB port on the back of your computer and to the connector on your phone.

2. Start using the data communications application on the computer.

   Note that making or answering phone calls during a computer connection is not recommended as it might disrupt the operation.

   For a better performance during data calls, place the phone on a stationary surface with the keypad facing downward. Do not move the phone by holding it in your hand during a data call.
8. Battery information

■ Charging and Discharging

Your phone is powered by a rechargeable battery. Note that a new battery’s full performance is achieved only after two or three complete charge and discharge cycles.

The battery can be charged and discharged hundreds of times but it will eventually wear out. When the operating time (talk-time and standby time) is noticeably shorter than normal, it is time to buy a new battery.

Use only batteries approved by the phone manufacturer and recharge your battery only with the chargers approved by the manufacturer.

Unplug the charger when not in use. Do not leave the battery connected to a charger for longer than a week, since overcharging may shorten its lifetime. If left unused a fully charged battery will discharge itself over time.

Temperature extremes can affect the ability of your battery to charge.

Use the battery only for its intended purpose.

Never use any charger or battery which is damaged. Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object (coin, clip or pen) causes direct connection of the + and - terminals of the battery (metal strips on the battery) for example when you carry a spare battery in your pocket or purse. Short-circuiting the terminals may damage the battery or the connecting object.

Leaving the battery in hot or cold places, such as in a closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery. Always try to keep the battery between 15°C and 25°C (59°F and 77°F). A phone with a hot or cold battery may temporarily not work, even when the battery is fully charged. Batteries’ performance is particularly limited in temperatures well below freezing.

Do not dispose of batteries in a fire! Dispose of batteries according to local regulations (e.g. recycling). Do not dispose as household waste.
9. Genuine Accessories

A new extensive range of accessories is available for your phone. Select the accessories which accommodate your specific communication needs.

Some of the accessories are described in detail below.

For availability of the accessories, please check with your local dealer.

A few practical rules for accessories operation:

- Keep the accessories out of small children's reach.
- When you disconnect the power cord of any accessory, grasp and pull the plug, not the cord.
- Check regularly that all mobile phone equipment in a vehicle is mounted and operating properly.

Use only batteries, chargers and accessories approved by the phone manufacturer. The use of any other types may invalidate any approval or warranty applying to the phone, and may be dangerous.

### Battery

<table>
<thead>
<tr>
<th>Type</th>
<th>Tech</th>
<th>Capacity</th>
<th>Talktime *</th>
<th>Standby *</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLD-3</td>
<td>Li-lon</td>
<td>720 mAh</td>
<td>2 hrs – 5 hrs</td>
<td>150 hrs – 300 hrs</td>
</tr>
</tbody>
</table>

* Variation in operation times may occur depending on SIM card, network and usage settings, usage style and environments. Use of FM radio and integrated hands-free will affect talktime and standby.

### Indoor

**Travel Charger (ACP-12)**

Small, lightweight travel charger with multivoltage (100 – 240V) switcher technology. Provides easy and convenient way to charge the phone.

Note: The plug types vary according to different markets.
Indoor and Vehicle

Boom Headset (HDB-4)
This small and lightweight headset has a beautiful and distinctive Nokia design. Gives you excellent audio quality and you can answer or end calls by pressing the button on the microphone part of the headset.

Stereo Headset (HDS-3)
This stereo headset has a beautiful and distinctive Nokia design. Gives you excellent audio quality and you can answer or end calls by pressing the remote control button. A comfortable hands-free solution that makes listening to the phone's FM radio, a pleasure.

Vehicle

Mobile Charger (LCH-9)
The multi-voltage Mobile Charger, LCH-9, ensures your phone is always ready for use whenever you travel. This small charger's functional design fits most car lighters and interiors. A green light indicates that the Mobile Charger is ready for charging. Check the charging status on the phone display. The input voltage can be 12 or 24 V DC, negative grounding. Avoid prolonged charging with the Mobile Charger when the car engine is not running; this may cause the battery of your car to drain. Note also that in some cars the cigarette lighter plug is not provided with electricity if the ignition is switched off. Verify that the green LED light is on.
10. Care and Maintenance

Your phone is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you to fulfil any warranty obligations and to enjoy this product for many years.

- Keep the phone and all its parts and accessories out of the reach of small children.
- Keep the phone dry. Precipitation, humidity and all types of liquids or moisture can contain minerals that will corrode electronic circuits.
- Do not use or store the phone in dusty, dirty areas. Its moving parts can be damaged.
- Do not store the phone in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the phone in cold areas. When it warms up (to its normal temperature), moisture can form inside, which may damage electronic circuit boards.
- Do not attempt to open the phone. Non-expert handling may damage it.
- Do not drop, knock or shake the phone. Rough handling can break internal circuit boards.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the phone.
- Do not paint the phone. Paint can clog the moving parts and prevent proper operation.
- Use only the supplied or an approved replacement antenna. Unauthorised antennas, modifications or attachments could damage the phone and may violate regulations governing radio devices.

All of the above suggestions apply equally to your phone, battery, charger or any accessory. If any of them is not working properly, take it to your nearest qualified service facility. The personnel there will assist you and, if necessary, arrange for service.
11. Important Safety Information

■ Traffic Safety
Do not use a hand-held telephone while driving a vehicle. Always secure the phone in its holder; do not place the phone on the passenger seat or where it can break loose in a collision or sudden stop.
Remember road safety always comes first!

■ Operating environment
Remember to follow any special regulations in force in any area and always switch off your phone whenever it is forbidden to use it, or when it may cause interference or danger.
Use the phone only in its normal operating positions.
Parts of the phone are magnetic. Metallic materials may be attracted to the phone, and persons with a hearing aid should not hold the phone to the ear with the hearing aid. Always secure the phone in its holder, because metallic materials may be attracted by the earpiece. Do not place credit cards or other magnetic storage media near the phone, because information stored on them may be erased.

■ Electronic devices
Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers
Pacemaker manufacturers recommend that a minimum separation of 20 cm (6 inches) be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers:

- Should always keep the phone more than 20 cm (6 inches) from their pacemaker when the phone is switched on;
- Should not carry the phone in a breast pocket;
- Should use the ear opposite the pacemaker to minimise the potential for interference.
- If you have any reason to suspect that interference is taking place, switch off your phone immediately.
Hearing aids
Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider.

Other medical devices
Operation of any radio transmitting equipment, including cellular phones, may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external RF energy or if you have any questions.

Switch off your phone in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Vehicles
RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles (e.g. electronic fuel injection systems, electronic anti-skid (anti-lock) braking systems, electronic speed control systems, air-bag systems). Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted facilities
Switch your phone off in any facility where posted notices so require.

Potentially explosive atmospheres
Switch off your phone when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Users are advised to switch off the phone when at a refuelling point (service station). Users are reminded of the need to observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas), chemical plants or where blasting operations are in progress.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats; chemical transfer or storage facilities; vehicles using liquified petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powders; and any other area where you would normally be advised to turn off your vehicle engine.

Copyright © 2004 Nokia. All rights reserved.
Vehicles

Only qualified personnel should service the phone, or install the phone in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty which may apply to the unit.

Check regularly that all wireless phone equipment in your vehicle is mounted and operating properly.

Do not store or carry flammable liquids, gases or explosive materials in the same compartment as the phone, its parts or accessories.

For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including both installed or portable wireless equipment in the area over the air bag or in the air bag deployment area.

If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Using your phone while in the air is prohibited. Switch off your phone before boarding an aircraft. The use of wireless telephones in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network and may be illegal.

Failure to observe these instructions may lead to suspension or denial of telephone services to the offender, or legal action or both.

Emergency calls

Important: This phone, like any wireless phone, operates using radio signals, wireless and landline networks as well as user-programmed functions. Because of this, connections in all conditions can not be guaranteed. Therefore, you should never rely solely upon any wireless phone for essential communications (e.g. medical emergencies).

Emergency calls may not be possible on all wireless phone networks or when certain network services and/or phone features are in use. Check with local service providers.

To make an emergency call:
1. If the phone is not on, switch it on. Check for adequate signal strength. Some networks may require that a valid SIM card is properly inserted in the phone.
2. Press as many times as needed (e.g. to exit a call, to exit a menu, etc.) to clear the display and ready the phone for calls.
3. Key in the emergency number for your present location (e.g. 112, 911 or other official emergency number). Emergency numbers vary by location.
4. Press the \key{key}.
If certain features are in use, you may first need to turn those features off before you can make an emergency call. Consult this guide and your local cellular service provider.
When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your wireless phone may be the only means of communication at the scene of an accident – do not cut off the call until given permission to do so.
Certification information (SAR)

THIS MODEL PHONE MEETS REQUIREMENTS FOR EXPOSURE TO RADIO WAVES

Your mobile phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the limits for exposure to radio frequency (RF) recommended by international guidelines (ICNIRP). These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines were developed by independent scientific organisations through periodic and thorough evaluation of scientific studies. The guidelines include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit stated in the international guidelines is 2.0 W/kg*. Tests for SAR are conducted using standard operating positions with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a base station, the lower the power output of the phone.

The highest SAR value for this model phone when tested for use at the ear is 0.60 W/kg. While there may be differences between the SAR levels of various phones and at various positions, they all meet the relevant international guidelines for RF exposure.

* The SAR limit for mobile phones used by the public is 2.0 watts/kilogram (W/kg) averaged over ten grams of body tissue. The guidelines incorporate a substantial margin of safety to give additional protection for the public and to account for any variations in measurements. SAR values may vary depending on national reporting requirements and the network band. For SAR information in other regions please look under product information at www.nokia.com.
