Introduction

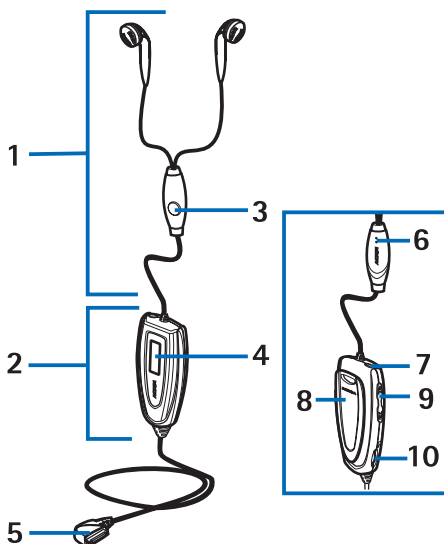

The Radio headset HS-2R combines a stereo FM radio unit and a headset. The radio headset can be connected to compatible Nokia phones with a Pop-Port™ connector, for example Nokia 6100. For compatibility of HS-2R radio headset with the phone model 6100 contact your dealer. Using the headset, you can make and receive calls and listen to the radio while on the move or in the office. The radio headset offers a possibility to listen to the radio with those mobile phones not equipped with an FM radio.

Read this user's guide carefully before using the headset. More detailed information is provided in your phone's user's guide. Do not use the present user's guide in place of your phone's user's guide, which provides important safety and maintenance information.

The present user's guide explains how to use the headset in connection with the basic call functions and how to use the radio's FM headset.

■ Overview of the headset

The Radio Headset HS-2R consists of the following parts:

1. Headset with earplugs
2. Stereo FM radio unit
3. Send/end button to answer, reject or end the call. One long keypress of the send/end button activates voice dialling.
Your phone needs to support voice dialling.
4. One line display to indicate the selected radio channel.
5. Pop Port connector to connect the headset to the phone.
6. Microphone
7. Power key to switch the radio on or off.
8. Carrying clip with a hook for attaching the strap
9. ⏮ and ⏭ buttons for searching radio channels.
10. Volume roller to adjust volume.

1. Using the headset

■ Making a call

When the headset is connected to your phone, press the send/end button to make a call.

To end the currently active call, press the send/end button.

You can also make and end a call by using your phone.

■ Answering and rejecting a call

Press the send/end button to answer an in-coming call. If you do not want to answer the call, press the send/end button twice briefly.

You can also answer or reject the call by using your phone.

When you receive a call, you hear a selected ringing tone on your phone.

Automatic answer

If the Automatic answer function in your phone is set to On, the phone automatically answers the incoming call after one ring.

■ Voice dialling

When no call is in progress, press and hold the send/end button until you hear a tone, indicating that you can say the name you want as a voice tag. Say the voice tag. The phone plays the voice tag and dials the corresponding phone number.

You can also activate voice dialling with your phone. For details on using voice dialling, see your phone's user's guide.

Your phone needs to support voice dialling.

■ Adjusting the earpiece volume

During a call, turn headset's volume roller to increase or decrease the volume, or, alternatively, use the volume key on your phone.

2. Using the FM radio

The Pop-Port connection on your phone functions as the power source for your radio headset. Connect the headset to your phone when you want to listen to the radio.

Note: The phone must be switched on to use this function. Do not switch on the phone when the use of a wireless phone is prohibited or when it may cause interference or danger.

■ Listening to the radio

- To switch the radio on, press the power key. The headset automatically selects the radio channel you have last listened to. The channel number is shown on the headset display.
- To search for a channel automatically, press either the ⏮ or ⏭ button for more than one second. To search for a channel manually, press the ⏮ or ⏭ button quickly.
- Press ⏭ to search for higher frequencies, and ⏮ to search for the lower frequencies.

■ Call functions when using the radio

- When you make or receive a call, the radio is muted automatically, and you can make a call and answer the call by pressing the send/end button. When you end the call, the radio is automatically switched back on.
- To reject a call, press the right selection key on your phone. The radio is automatically switched back on.

Care and maintenance

Your headset is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you to fulfil any warranty obligations and to enjoy this product for many years.

- Keep all accessories out of the reach of small children.
- Keep the headset dry. Precipitation, humidity and all types of liquids or moisture can contain minerals that will corrode electronic circuits.
- Do not use or store the headset in dusty, dirty areas. Its moving parts can be damaged.
- Do not store the headset in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the headset in cold areas. When it warms up (to its normal temperature), moisture can form inside, which may damage electronic circuit boards.
- Do not attempt to open the headset. Non-expert handling may damage it.
- Do not drop, knock or shake the headset. Rough handling can break internal circuit boards.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the headset.
- Do not paint the headset. Paint can clog the moving parts and prevent proper operation.

If the headset is not working properly, take it to your nearest qualified service facility. The personnel there will assist you and, if necessary, arrange for service.
